

COLLEGE OF DESIGN & ENGINEERING

How to Design Effective Learning Spaces for Adult Learners

Designing effective learning spaces requires balancing the diverse needs and preferences of various learners. This course offers a blend of synchronous and asynchronous e-learning and a practical one-day workshop. It addresses key questions: How to design for different learner types, ensure flexibility in learning environments, integrate digital tools, and create cost-effective, enjoyable, and inclusive designs. These considerations are essential for modern, adaptable learning spaces that cater to all users.

SPEAKER PROFILE

Mr Yong Jieyu

Yong Jieyu is the founding director of STUCK – an award winning design consultancy with works spanning research, product, interaction and experience design. His expertise has led to the creation of multiple successful and meaningful designs for government entities, multinational corporations and innovation startups. Jieyu is also a passionate advocate for design education and methodology. His dedication to this field has seen him invited to speak, critique and teach at local and overseas universities and polytechnics. Alongside Edwin Low, Jieyu co-wrote the Design Thinking Curriculum at Singapore Polytechnic. He is also actively involved in part-time lecturing at the Division of Industrial Design, National University of Singapore since 2010.
