

COLLEGE OF DESIGN & ENGINEERING

Inclusive Design: Leverage Design Thinking to Create Inclusive Spaces and Experiences

This course is designed for architects, planners, DEI teams, and leaders aiming to create inclusive spaces. It utilizes a user-centric approach to understand stakeholder needs and designs relevant, engaging environments. Participants will learn placemaking tools and strategies to enhance innovation within their organizations.

The course covers methods to plan, frame, and scope equitable initiatives and fosters collaboration for developing new spaces. An intensive one-day workshop filled with hands-on activities allows participants to apply design-led strategies directly to their organization's challenges. By the end, they will acquire new ideas and tools to implement effective, inclusive placemaking solutions in their workplaces, ensuring spaces are functional, efficient, and enjoyable for users.

SPEAKER PROFILE

Mr Lee Tze Ming

Lee Tze Ming is an adjunct lecturer at the Division of Industrial Design, National University of Singapore. By bringing business perspective coupled with broad domain knowledge via active innovation consulting practice, Tze fluidly bridges conceptual innovation with market pragmatism. His teaching emphasises doing in order to think, experiencing in order to discern and make better design decisions yourself. Wynton Marsalis said it better: "Don't adopt my prejudices; develop your own."
