4.0. TEACHING

• Personal Teaching Philosophy

My objective in teaching is to educate the students to become knowledgeable intellectuals capable of critical thinking and creative performance with distinct integrity of character.

I believe pedagogy is the main tool for achieving this goal; therefore although I am also target / outcome oriented I am even more concerned with the learning process. This point is particularly important in teaching Design Studio as the development of creative individuals overcomes the limits of any project and is a continuous and cumulative process of evolution. Teaching design should always combine the conveying of the theoretic and pragmatic design knowledge with encouraging students to ponder into their own personalities and develop their inner self in the context of the complex world. Interactions with the wider community are essential for raising awareness of the social art of architecture. Thus, I encourage students and implement diverse methods of engaging user experts in the design process. I also believe that teaching design students has many facets, from transferring knowledge to inspiring, encouraging and being a fair and sharp critic along the way. In that sense design research and implementation of various teaching, learning and exploration techniques is in the core of my teaching philosophy.

- **Strategies, Objectives and Methodologies**

Main objective is to constantly work on developing interactive methods of teaching / learning and implement them in “Space and Health” modules and Design Studio teaching.

Pedagogical strategies:

- creating a challenging learning environment for the students;
- exposing the students to experiences from the real world, real users
- fostering communication and collaborative / interactive projects.

4.1. TEACHING AT THE UNIVERSITY OF BELGRADE (2011-2015)

MODULES | M.ARCH. GRADUATE LEVEL

- M6.1. Design Thesis Studio | Architecture (2011-2015)
- MACA1103003 Human Ecology –Space and Health (2014)
- M7.3. Design Workshop (2011-2014)
- M4.2. Human Ecology and built environment-from anaesthesia to synaesthesia | Seminar (2011-2012)
- M6.2. Beyond Geometry- Ecology and Technology in Architecture | Seminar (2012)
- M6.2. Human Ecology –Space and Health | Seminar (2013)

Postgraduate teaching

Supervision of research students, PhD and M.A. Arch level

- Vladimir Milenkovic, PhD (2012)

Member of PhD defence panel of critics

- Milena Kordic
- Ana Vignjevic

4.2. TEACHING AT THE NATIONAL UNIVERSITY OF SINGAPORE (2001-2024)

TEACHING HISTORY

Leadership Roles & module/curriculum development /selection/

2020-2024

- Deputy Head, Administration and Finances, Department of Architecture, College of Design and Engineering, National University of Singapore
- Urbanism Research Cluster Leader

2023-2024

cross Departmental teaching collaborations:

- Minor in Integrative Health (MIH 2022), **Yong Loo Lin School of Medicine**; As member of interdisciplinary teaching team participated in curriculum & course structure

preparations (Minor has been approved and taught from AY 2023-24. Module will be taught in sem 1 AY 2024-2025.) RBS teaching participation is 3x3h per session).

- Guest Lecture cum discussion (3h) on “Built Environment and Health”, Course: “Society and Health”, School of Public Health, NUS. (to be delivered in sem 1, 2024-2025).

2020-2024

- Human ecology, Space & Health SPECIAL: Discussing the Sensorial. Innovative teaching method “flipped learning and discussions” in Elective Courses. This effort is aligned with promoting core NUS values: creative thinking, resilience and integrity of NUS students. Results are acknowledged in students feedback scores and evaluation beyond the College/Department average.

2002-2022

- Elective Module Human ecology- Space and Health
- GEK1050 Space and Health (GEK- General Education Knowledge modules are approved and offered at University level)

Module is introducing teaching and research on healthful architecture as a subject in NUS/DOA, thus qualifying it for membership in GUPHA-The Global University Programs in Healthcare Architecture. Module superseded the elective Module "Architecture and Healthcare" taught in the Department of Architecture since 2002.

2011-2018:

- Human Ecology and Built Environment - Space and Health

2001-2024

- Year 3 Design Studio Coordinator; AR3101 Design5; AR3102 Design 6

2002 -2003

- Year 3 Design Studio Sub-Coordinator

2002-2007

- Chair-DOA Electives/GEM/SS / ISM Independent Study Modules
Co-ordination Committee on Undergraduate and Graduate level

Modules taught

Undergraduate Teaching

- AR3102 Design 6 (2001-2016)
- AR4323 Integrated Design & Sustainability; 2 lectures/ sem., 2009-2016

Innovative Methodology /in GEK 1050 "Space and Health module/

- Indicative Research of real healthcare spaces as learning method; involves students' intellectual potentials to apply knowledge in real life situations and engage in finding creative solutions for improvement. Venues for indicative research projects were Alexandra Hospital, Singapore General Hospital, Khoo Teck Puat Hospital, Tan Tock Seng Hospital, NUS Library and other public spaces (schools, East Coast Park, cafés, HDB housing blocks, etc.) Three projects mentioned below are particularly interesting for their innovative approach and collaboration with external counterparts:
 - GEK1050 Space and Health; 2010-2011
 - Project on evaluating the green branding in four Green Mark awarded hospitals in Singapore. Results are contributing to improving the Green Mark tool.
 - GEK1050 Space and Health; 2009-2010
 - Project on Visual Images in University Public spaces and NUS Main Library (P1+P2) in collaboration with NUS Main Library. Results presented as contribution to improving NUS public areas.
 - GEK1050 Space and Health; 2008-2009
 - Project on Visual Images in SGH (P2) in collaboration with SGH Singapore General Hospital: Onsite investigations, analysis and strategies for improving hospitals public spaces and wards. Survey on visual images in SGH; students collected and analyzed over 400 responses from staff visitors and patients
 - Results presented to SGH counterparts. Ideas for improvement accepted for implementation by SGH Facility Development Department.
 - Extensive use of media, vwww interactive platforms, IVLE, blog, forum, etc.
 - GEK1050 Space and Health; 2007- 2008
 - Collaboration established with Professor Franklin Becker, Chair, Department Design & Environmental Analysis, College of Human Ecology, Cornell University, USA. NUS and Cornell students investigated real healthcare spaces in respective cities and exchanged experiences and findings. Intensive use of IVLE (Integrated Virtual learning environment), module blog, Video-conferencing and other IT resources were exploited.

Teaching related AWARDS / PRIZES

2018

- Zdravko Trivic (RBS Supervisor) was one of 5 winners of the international competition "The Sydney Challenge" (The Fit City Competition - <http://www.fit-city.org>) - an International Urban Design and Public Health Competition for Students sponsored by the Oxford Health Alliance (www.oxha.org). Selected out of 200 entries from more than 40 countries.

2005

- Choo Ying Hui, Colin (RBS Supervisor) -awarded Gold Medal and Deans list Award

2004

- Pok Su Lin- Thesis Design Project (RBS Supervisor) awarded: Tsao Ng Yu Shun Award for Excellence in Ageing Study

2003

- Su Xuixin (RBS Supervisor)- Year 3 project Dynamic Statics-The Temple of Shiva awarded: SARA Honorable Mention at the Society of American Registered Architects (SARA) Student Design Awards Competition
- Ms Chew May Hoon (RBS Supervisor)- Thesis Design Project awarded: Tsao Ng Yu Shun Award for Excellence in Ageing Study

4.3. TEACHING AT THE UNIVERSITY OF BELGRADE (1989 -2000)

MODULES

- **Design 3 - Design typology - Healthcare Facilities**

Year 3 module on Health Care Environments and Design for Healthcare Facilities.

12 weeks of lecturing /semester. Interdisciplinary approach, philosophy of space-health relations, contextual background, design solutions, theories and changes in healthcare design discourse and practice.

- **Design Studio teaching / in the capacity of Studio Master**

Design STUDIO I Second year program

Design STUDIO II Third year program

Design STUDIO III Fourth year program

- **PPP – Particular Problems of Architectural Design;**

Fifth year Module; fall semester. Elective program for students selected upon their success in Design Studio I-III. This group of most talented students is encouraged to work on programs of specific character, in order to update and treat issues from previous years of study on a more profound level.

Dr Bozovic-Stamenovic developed the specific curriculum, the "Dialogue Competitions", meant to involve and gather in the same program students from different countries.

Being both conceptual and detailed design program, program required awareness of complex contextual and cultural issues in different countries, as well as meticulous research and interdisciplinary approach to architectural problems.

Dr Bozovic-Stamenovic initiated and executed the first Dialogue Competition Program "The Pavilion of the XX Century" in 1997/98. The program involved students and professors from Faculty of Architecture, Building & Planning, University of Melbourne, Australia. It was successfully realized and exhibited in Belgrade and Australia.

- **Mentor for numerous DIPLOMA DESIGN PROJECTS**
- **Supervisor /Examiner for a number of Mr. Sc./ Dr Sci. Candidates**

5.2. SERVICE TO THE UNIVERSITY OF BELGRADE (1989-2014)

2001-2015	<u>Liaison staff</u> in charge of the MOU with National University of Singapore
1998-2000	<u>Deputy Head of the Chair of Design, Faculty of Architecture, University of Belgrade</u>
1998-2000	<u>Elected member of the Scientific & Education Council</u> of the Faculty of Architecture, University of Belgrade
1994-1996	<u>Elected member of the Council</u> of the Faculty of Architecture, University of Belgrade
1996-1998	<u>President of the International Relations Committee</u> Faculty of Architecture, University of Belgrade
1989-2000	<u>Appointed member</u> of a number of departmental committees, Faculty of Architecture, University of Belgrade: -International Relations Committee, -INDOC /IT & documentation/ Center committee, -Editorial & Publication committee, -Curriculum Development Committee, etc.

Dr Bozovic-Stamenovic was particularly interested in developing and promoting international relations at the Faculty of Architecture in Belgrade. She was directly and actively involved in such activities in the period of 1990-1993 when intensive collaboration programs took part, in particular with two French schools: Ecole d'Architecture Paris la Defence, and Ecole d'Architecture Paris-Conflans.

Upon the signed Protocols of collaboration, the program established included exchange of teaching curriculum, exchange of visiting professors, exhibitions, etc. Students were working on the same program and assessed by the juries composed of both Belgrade and Paris professors. Degrees were reciprocally recognized.

In the period of 1996-98 Dr Bozovic-Stamenovic initiated and organised the collaboration with MARHI, Moscow Institute of Architecture, Russia.

In the period of 2000-2015 Dr Bozovic-Stamenovic developed and maintained consistent connections with The Department of Architecture, National University of Singapore. As a result NUS high level representatives visited the University of Belgrade, Faculty of Architecture (2005, 2006) | Memorandum of Understanding was signed in 2005 | three Ph.D, students from Belgrade were awarded full scholarships to study at NUS and successfully completed their post-graduate studies| NUS staff and students attended several conferences and workshops organized by the University of Belgrade and visited University on Belgrade on several occasions.
