Zicheng Fan is a PhD candidate at the Department of Architecture, National University of Singapore. He is currently working under the supervision of Dr Filip Biljecki at NUS Urban Analytics Lab (UAL), to explore the wide application of 3D GIS and Digital Twins in revealing various people-space interactions in 3D built environments and in dynamic urban scenarios.

Zicheng holds a MSc degree in Space Syntax: Architecture and Cities, and a MRes in Spatial Data Science and Visualisation from University College London. His previous research interest and experience are mainly in the intersection of urban morphology, spatial perception, and machine learning.
