[Curriculum Vitae](#)

Tiantong is a PhD student in Architecture at NUS, working under the supervision of Dr. Naomi Hanakata. Her research interests focus on the planetary urbanization processes, seeking to understand how human-nature interactions shape urban systems, how novelty emerges during it, and how adaptive planning can respond to these dynamic interactions and changes.

Currently she is a studio lead, teaching the Liveable City Studio at NUS Cities, and also works as a teaching assistant for Urban Design Theory and Praxis course. Tiantong obtained her bachelor's degree at CSU Fresno, followed by a Master of Landscape Architecture at the University of Michigan and a second Master of Urban Design at the University of California, Berkeley. Prior to joining NUS, she worked for various award-winning landscape and urban design firms in the U.S.
