He Zhuoshu is a PhD student at Department of Architecture, NUS. He is the PhD Representative of the department. His research resides on both urban diversity and quantitative urban morphology, exploring how built-form diversity can be measured, and whether it facilitates housing mix and social mixing. Zhuoshu is also the Teaching Assistant (Educator Track) of Master of Arts (Urban Design) program, where he actively contributes to teaching activity, admission, and administration.

Zhuoshu obtained his Master of Urban Planning degree from The State University of New York at Buffalo and bachelor's degree in urban planning from South China University of Technology. He worked as RA at NUS-Tsinghua Design Research Initiative of Sharing Cities, and School of Social Science, Singapore Management University. His working paper was awarded the Best Paper Award in the 13th Conference of International Forum on Urbanism.
