Binyu Lei is a PhD researcher in Urban Analytics Lab at the Department of Architecture and is working with Dr Filip Biljecki. Her research focuses on conceptualisation, semantics and adoption of 3D city models and digital twins, as well as publicly available data.

Binyu holds a Master's degree in Urban Planning from the University of Melbourne and a Bachelor's degree in Human Geography and Regional Planning from East China Normal University. Currently, she serves as a research associate for Multi-scale Digital Twins for the Urban Environment, leading the development of a digital twin campus platform.
