

LI, Siyu

Research Area: Climate Change, GIS

LI Siyu is a PhD student at the Department of Architecture, National University of Singapore, where she is being supervised by Prof. Rudi Stouffs. Her research focuses on the climate change and Geographical Information Science (GIS), with an emphasis on the current impact and risk of increasing extreme events and stresses caused by climate change among rapidly urbanizing cities.

Siyu holds a MSc degree in Environmental Science from Beijing Normal University. Her previous research interest and experience are mainly in the climate change and geography.
