QIAO Runze is now enrolled in the program leading to the degree of Doctor of Philosophy in the Department of Architecture. He is also a student research assistant at the Centre for Sustainable Asian Cities. His research interest concerns urban regeneration driven by industrial upgrading.

Runze holds both his master's and bachelor's degrees in architecture design from Southeast University, China. He had experience studying at the Vienna University of Technology as an international exchange student from 2018.9 to 2019.2. Before changing his major to architecture, he used to study in the school of transportation at Southeast University.
