[Curriculum Vitae](#)

Yeshan is a PhD student at the Department of Architecture in the National University of Singapore. She completed her master's degree in landscape architecture at Shanghai Jiao Tong University. She is a PhD Researcher of Comparative Ecology of Cities, Future Cities Laboratory, ETH Zurich.

Her research focuses on how the distribution of natural spaces in cities can promote well-being for residents, and how urban planning and design strategies can be used to enhance biodiversity and ecosystem services in urban areas.
