

TAN, Johann Kay Ann

Research Area: Active Noise Control, Soundscape

Department of Architecture,
College of Design and Engineering,
National University of Singapore,
4 Architecture Drive, Singapore
117566

Email: tankayann@u.nus.edu

TAN, Johann is a current postgraduate student at the National University of Singapore, Department of Architecture (NUS DoA). He is also a full-time researcher in the same department. His current research interests covers the application of active noise control in the domestic setting, as well as the study of soundscapes in the urban environment. Johann has published papers in the Journal of Applied Acoustics and participated in conferences to share and contribute to the wider research community.

Having graduated from NUS with a bachelor's degree in music (Audio arts & sciences) from the Yong Siew Toh Conservatory. He has worked on previous research topics relating to 3D binaural audio and spent some time as an acoustics consultant and project manager for small to medium-sized design-and-build projects such as home studios and listening rooms.
