Zuyuan is a PhD student in the Department of Architecture at the National University of Singapore, where she is working under the supervision of Prof Tan Puay Yok and Prof Lau Siu Kit at NUS Urban Ecology Lab. Her research focuses on the impact of audio-visual interactions on landscape and soundscape assessment. She is also interested in emerging technologies such as bioacoustics, virtual reality, and point clouds and their applications in landscape architecture.

Zuyuan completed her master's degree in landscape architecture at the National University of Singapore (NUS). Her previous research experience has been mainly in design visualization and the use of point clouds in landscape architecture.
