Shuyang Li is a PhD candidate in the Department of Architecture and a PhD researcher at the Future Cities Laboratory, Singapore-ETH Centre. His research focuses on AI-aided urban design, multimodal perception and physiological data, computational design and design generation. He received his master's degree from Tongji University, China, where his research focused on virtual reality, environmental behavior, and computational design. He has served as an assistant editor for the journal *Urban Informatics* and as a reviewer for several academic journals and the CAADRIA conference.

- Young CAADRIA Award (March 2023)
- CSC Scholarship (May 2022)
- National Scholarship of China (Nov 2017)
- National Scholarship of China (Nov 2016)
