

College of Design and Engineering Safety & Health Policy

College of Design and Engineering of the National University of Singapore is committed towards creating, providing and sustaining a safe and healthy work environment. This responsibility extends to everyone in the College including all staff, students, research partners, contractors and visitors to the College.

The College's Safety & Health (S&H) policy statements are as follows:

1. The College is committed towards sustaining a positive Safety & Health culture that has been built over the years. Safety & Health best practices are continuously being integrated and improved upon in all areas of our business including education, research and other workplace activities.
2. The College shall take all reasonable efforts to ensure compliance with applicable S&H legislations, NUS S&H policies and directives, as well as all other Safety & Health best practices.
3. The College shall endeavour to eliminate hazards, if not adopt reasonably practicable means to minimize risk of injury and illness at all workplaces in the College. This shall be achieved through the implementation of related Safety & Health initiatives, programmes and management system in the College as well as in its Departments.
4. The College shall ensure adequate resources are allocated and available for the implementation of the Safety & Health initiatives, programmes and management system.
5. The College shall periodically review and identify opportunities for continual improvement of its Safety & Health performance.
6. The College strongly believes that every staff and student have a responsibility to comply with the College's Safety & Health Policy and work collaboratively to continually improve its Safety & Health performance for the benefit of everyone in the College.
