4:00 pm	End of Talk

Biography

Er. Vashdev A Khialani is a Registered Professional Engineer in the Institute of Engineers, Singapore and a Qualified Person who has been associated with the field of Civil and Structural Consultancy - since 1982.

Having finished my Bachelor's degree in the field of Civil Engineering in 1974 at the, then Singapore University (now National University of Singapore), I started my career working for the Housing and Development Board, Singapore. This gave me an opportunity to be a part of the Planning, Engineering design, Contract management and Supervision segment of HDB for many projects viz. Ang Mo Kio New Town N' hood 4 & 6 inclusive of Bridge at AMK Ave 9, Rajah Court Development inclusive of Bridge, Ah Hood Road Estate etc. After learning the basics of Civil Engineering through various HDB projects I went on to become an Acting Section Chief Engineering (Civil) at M/S Matthew Hall Engineering (SEA) Pte Ltd, Singapore. I was responsible for all the technical and administrative aspects of the section and co-ordination with other sections (process, mechanical, electrical, piping & project). This enabled me to be part of some important projects in Singapore like the construction and erection of 4 modules for Tapis 'D' Platform in South China Sea for M/S Sembawang Engineering Pte Ltd, Lube Oil complex revamp and Meroux treatment plant revamp for Shell Eastern Petroleum Pte Ltd etc.

After qualifying myself as a Professional Engineer and having gained a confidence that I can provide innovative, cost-effective, value based professional inputs for Civil and Structural Projects, I founded C&V Engineering Pte Ltd to provide Consultancy services in my field of Professional Expertise.

For the last 39 years, C&V Engineering Pte Ltd and C&V Consultants has a record of accomplishment of providing reliable services in Building Engineering Design, Fire Engineering Design and Construction based Environmental Engineering Design. I have been an active Professional Engineer and a Qualified Person and has involved himself in many important projects for Singapore by being a QP for projects involving LTA, PUB and HDB Projects.

Present position:

Managing Director, Project Consultant

Qualifications:

B Eng (Civil Engineering), 1974 - University of Singapore Master (Fire Safety Engineer), 2002 University of Wales, Australia
