

CHROMESPEC disrupts the portable spectroscopy industry by providing accurate color measurements anytime, anywhere, for anyone.

Problem

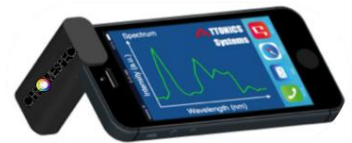

Spectroscopy today is a **difficult process**:

- Special setup needed
- Devices are difficult to use
- Prices for high-accuracy portable spectrometers range from **\$4000 - 10000**

Solution

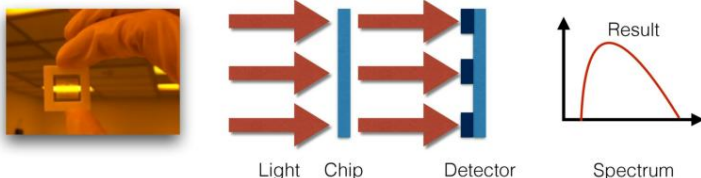

CHROMESPEC

- **Clip on** device
- High sensitivity
- **Low complexity**
- Affordable
- Suitable for **dynamic environments**
- Customizable analytics

Technology

- **Patented** technology
- Static **interferometer chip**
- Detects & **analyses** electromagnetic radiation in **a single pulse** of light

- + preserves advantages of FT spectrometers
- + wide spectral working band
- + high light throughput
- + fast

- + simple
- + no moving parts
- + rugged
- + compact

Competition

What makes us better?

- CHROMESPEC is more robust
- Easier to use
- Lighter & smaller

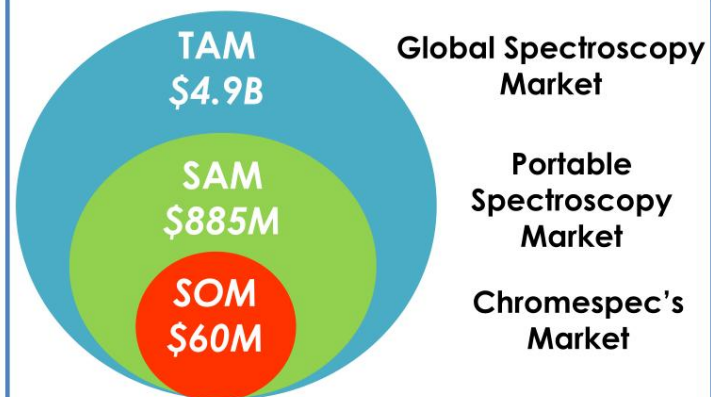

Financial Projections

Year 1-5

Market Size

Our target – APAC Spectroscopy market - \$70 M in 2015
