

Pain Point

75% Untreated Wastewater in Asia-Pacific

Scarce water

- Polluted Ground Water (Wells)
- Drying Surface Water (Rivers, Ponds)
- Expensive Mineral Water

Costly energy

- Energy Intensive Wastewater Treatment Systems
- Expensive Energy Supply in Remote Places

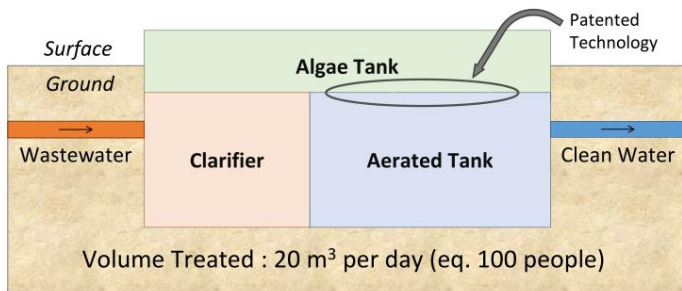

1/3 of the local income is spent on secured water supply

Solution

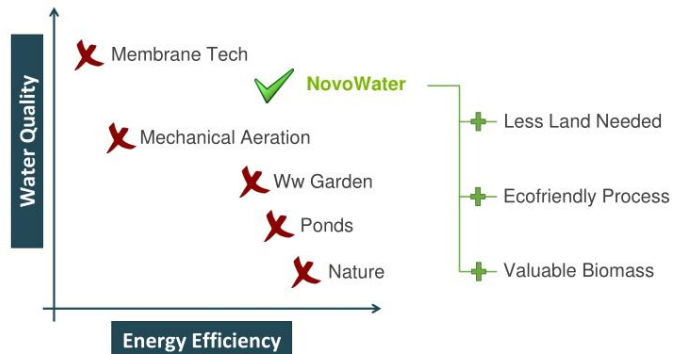

For remote areas without any waste management, we provide an **off-grid all-in-one ecofriendly** wastewater treatment system which provides **fresh water**.

Product – 2D View

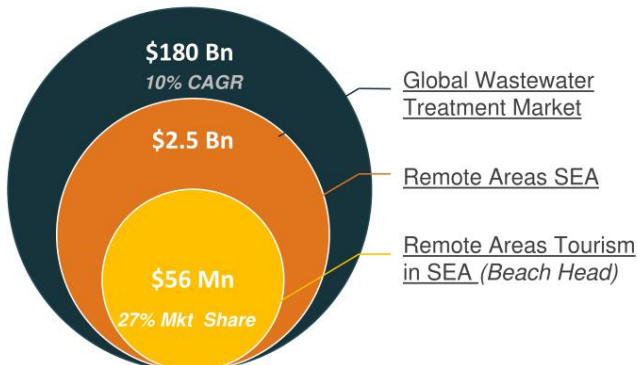

- Replacement of conventional energy intensive mechanical aeration by biological aeration.
- The entire system is packaged in a 20-foot container
