

SlideAlert provides an accurate wireless landslides alert system that gives 30 hours of advanced warning

Problem

Landslides cause severe damage all over the world

- 15 per week
- ~5000 deaths/ year
- ~\$ 8.1B economic damage per year

Solution

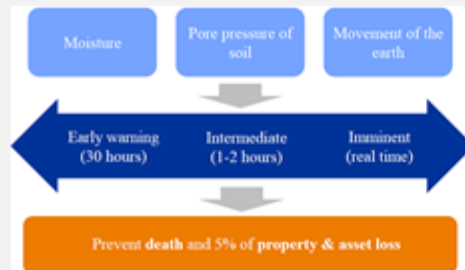

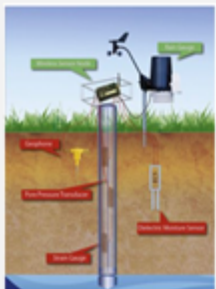

SlideAlert is a wireless sensor system

- Each probe covers 1 km²,
- Delivers comprehensive real-time data
- Early warning allows for early evacuation

Technology

Our technology encompasses an advanced analysis software, robust wireless system and accurate sensor elements.
