

# Trans+ | Intensify Nature's Colors

For photographers, Trans+ provides a single piece, light weight (<100g) neutral density lens that can continuously adjust light transmissivity at low power consumption (3V, 300-400uA).

## Problem

Faded Color

Change Filters Often

Bring Many Accessories & Lens

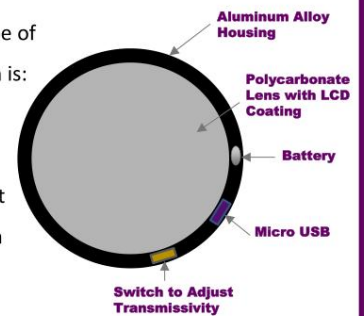

Fragile

## Solution

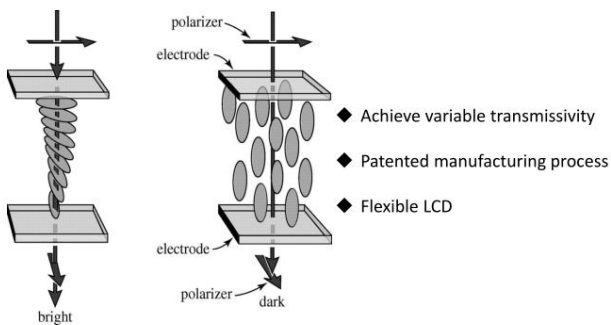

Trans+ provides a new type of neutral density lens which is:

- Single Piece
- Light-weight (<100g)
- Continuity of Adjustment
- Low Power Consumption (3V, 300-400uA)

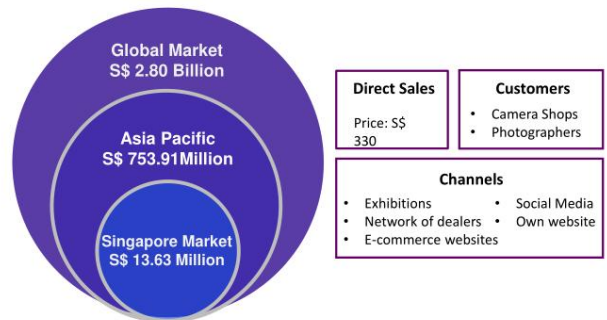

Patent: CN 203882066U | TW M486703 | JP 3193897

## Technology

Patent: CN 203882066U | TW M486703 | JP 3193897

## Market & Business Model

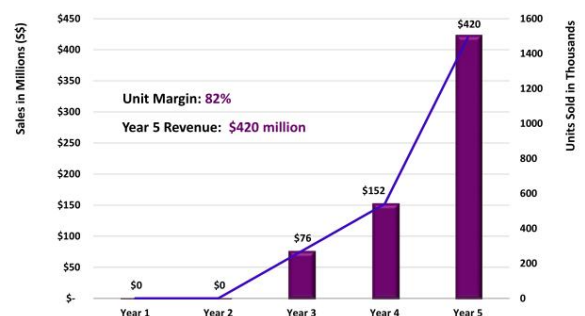

Passport Database : Euromonitor International from official statistics, trade associations, trade press, company research, trade interviews, trade sources.

## Competition

## Financials
