

Making Cells Grow Faster

ACELLERATOR aspires to be the solution provider that empowers cell culture companies to accelerate cell culture process through our revolutionary coating technology

Problem

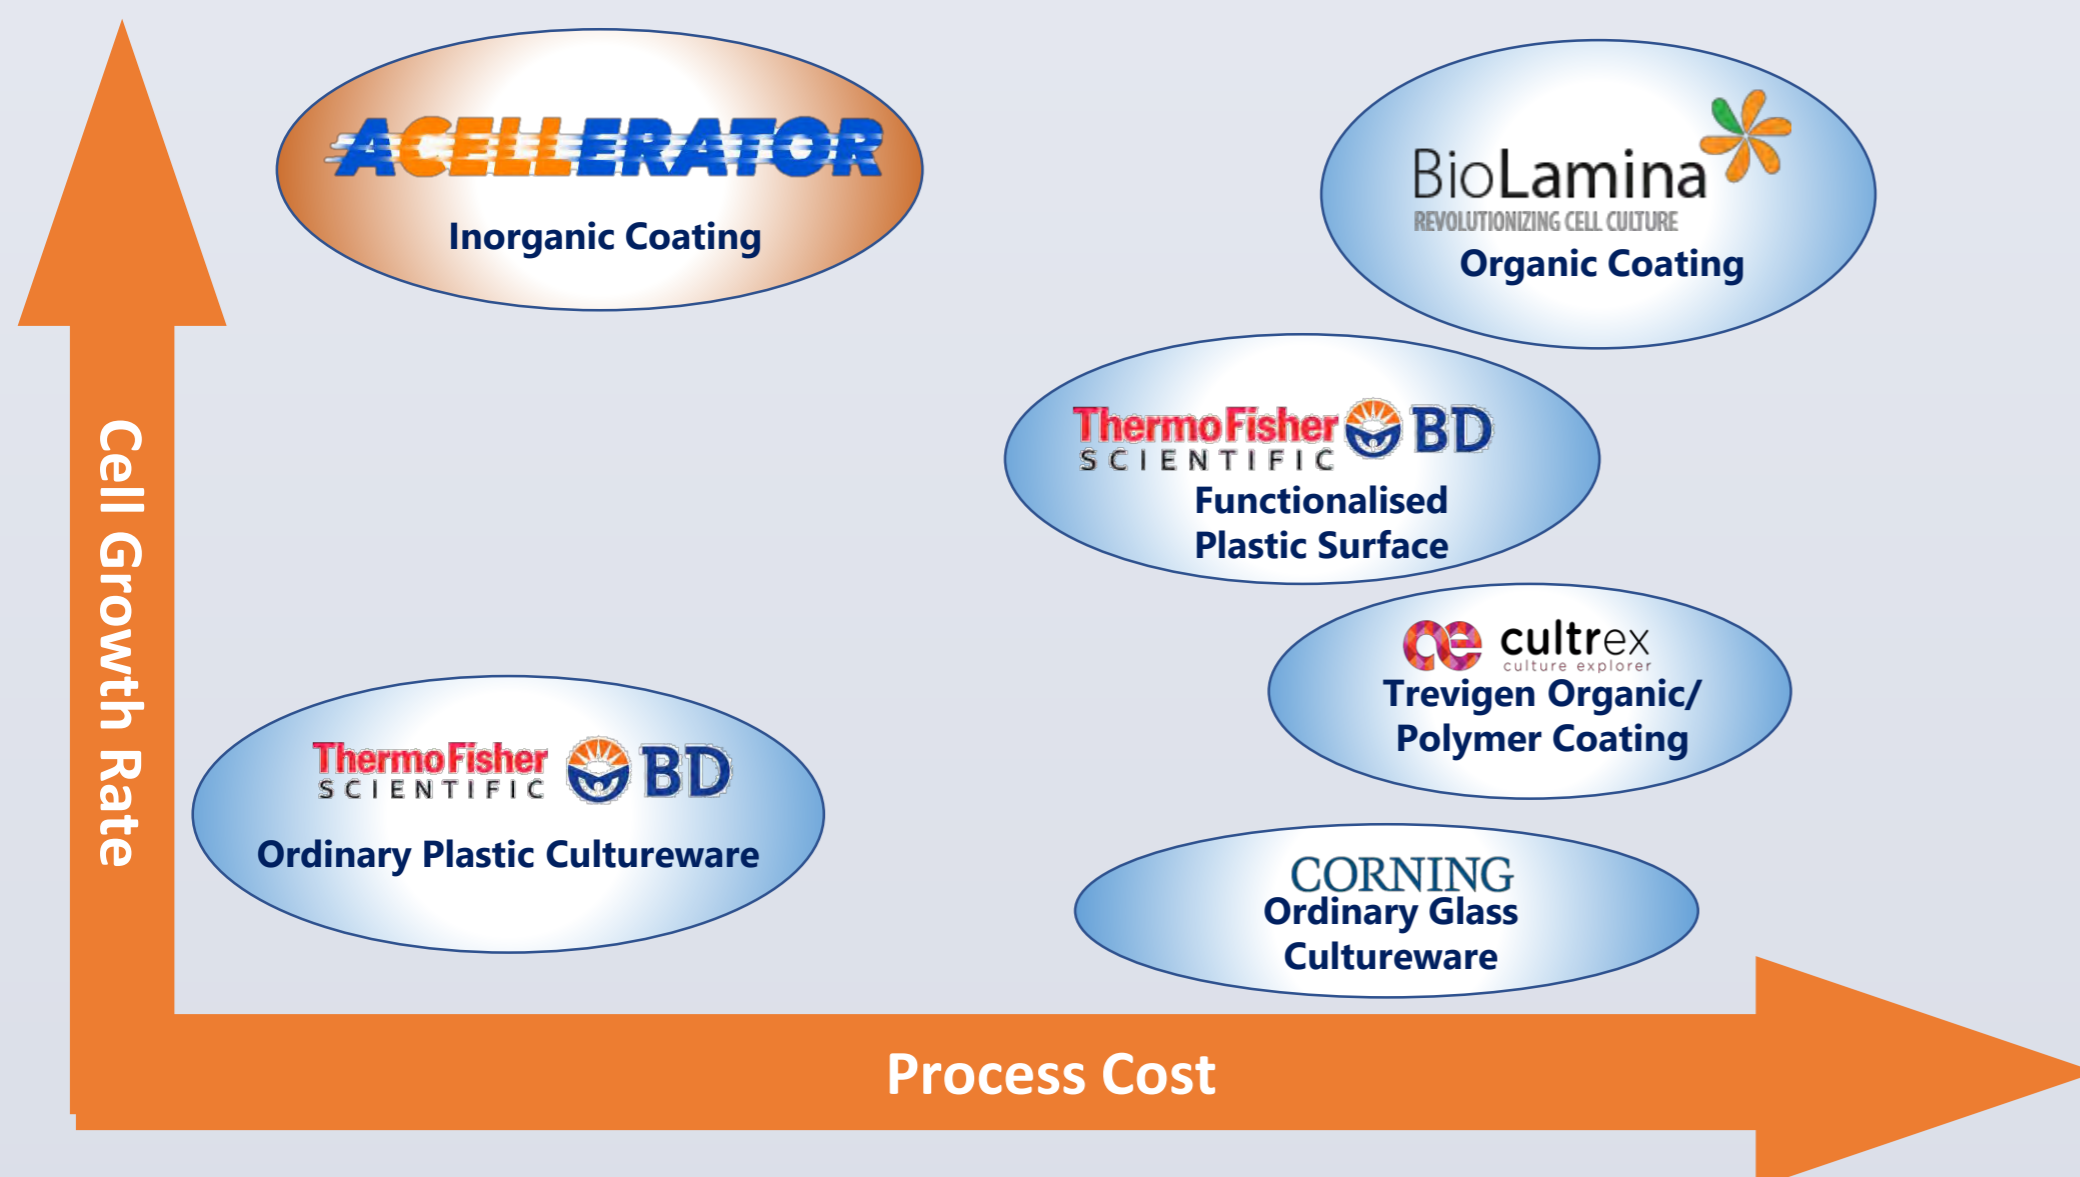

- ❖ Livestock Industry is one of the main contributors of greenhouse gas emissions (16%) and global warming
- ❖ Grazing takes up to 25% of the global available land
- ❖ Alternative Solution – Clean Meat (lab grown meat) is a sustainable solution against the conventional industry

But Clean Meat Companies (CMC) are facing issues with **SLOW CELL GROWTH**, making commercialization challenging

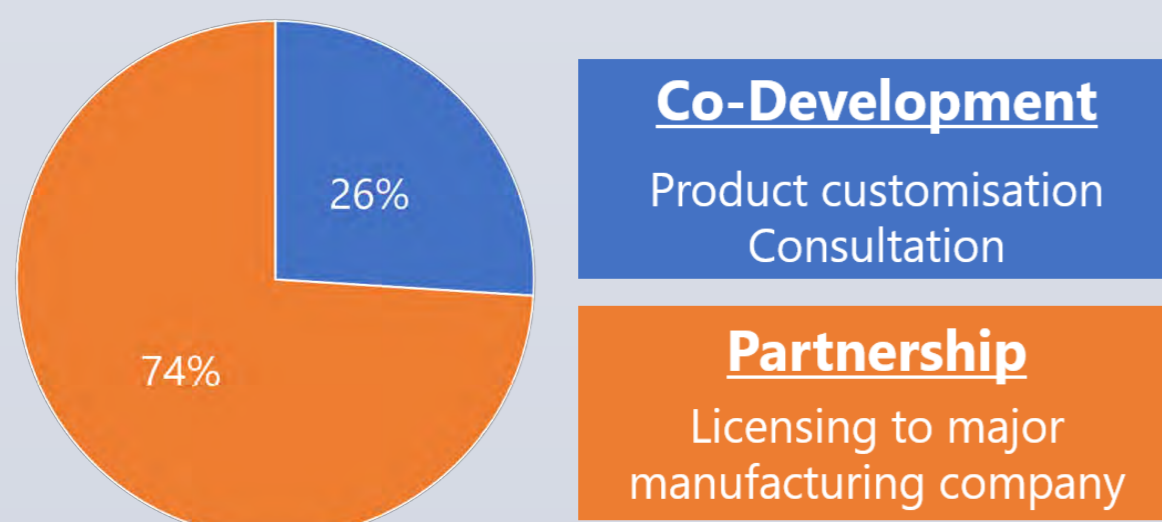

Competitive Analysis

- ❖ ACELLERATOR has the **LOWEST PROCESS COST** and **HIGHEST CELL GROWTH RATE**

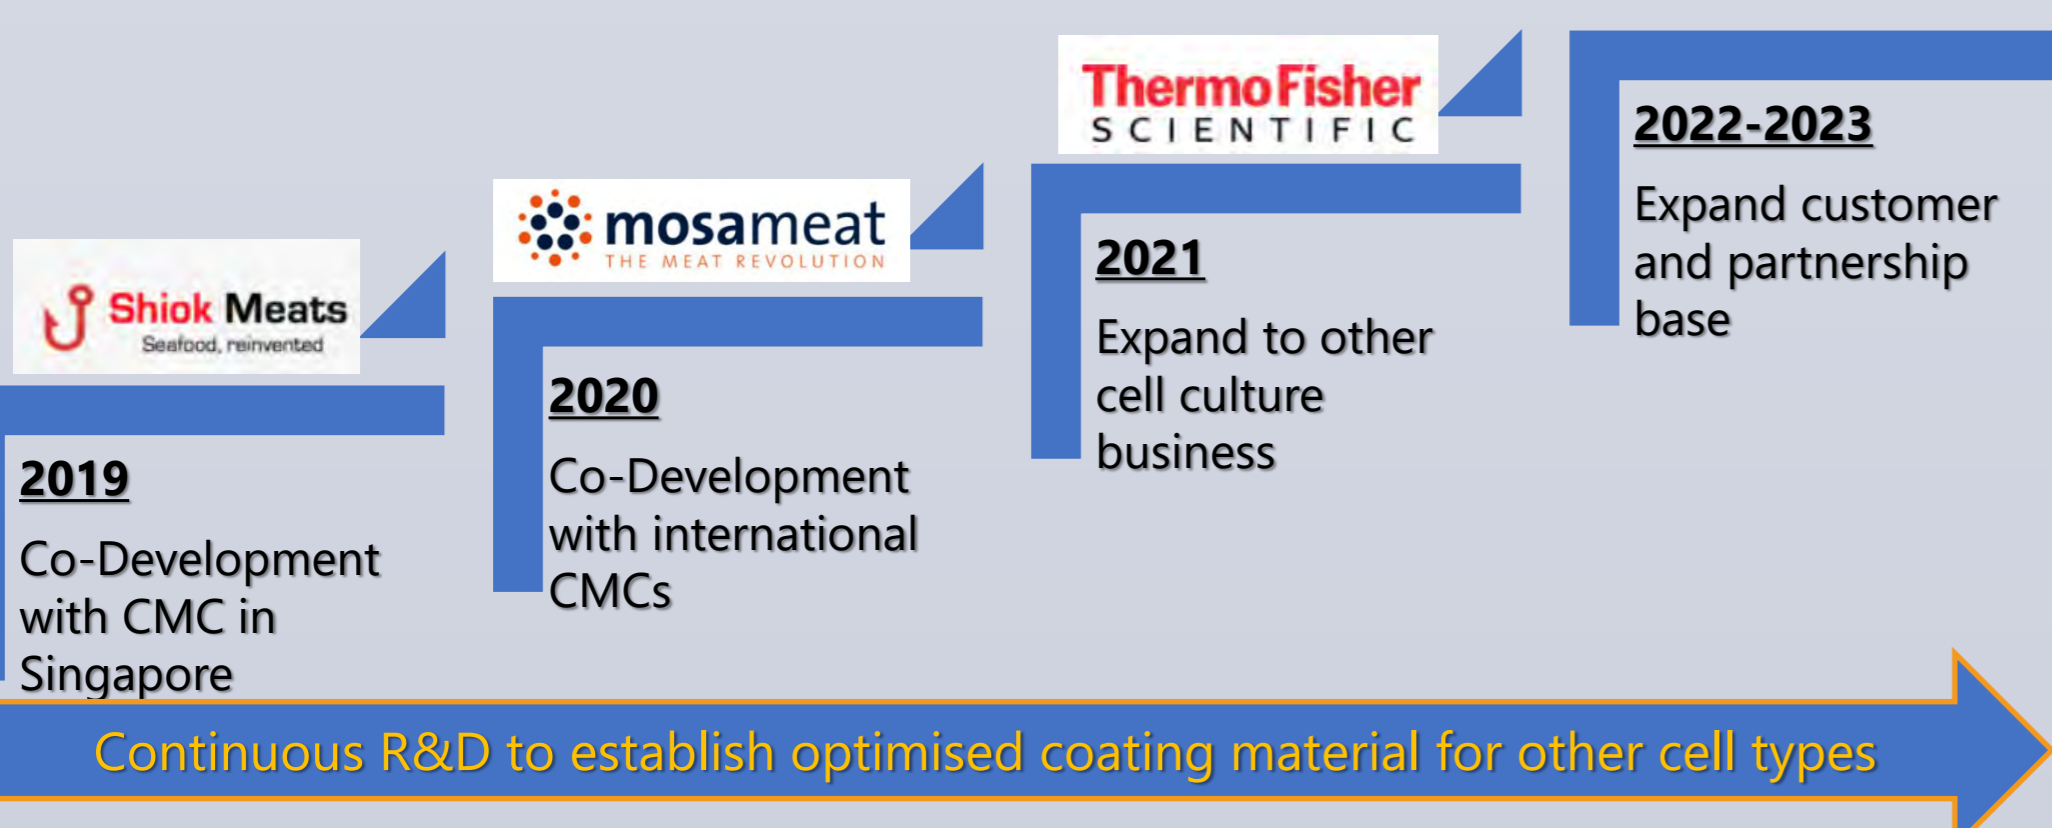

Business Model

Revenue Stream

5-Year Strategic Plan

Solution

Patented Laser Coated Technology (Patent: WO/2018/088966)

- ❖ **Accelerates cells growth** (2 times faster) to save cost and time
- ❖ **Customizes solution** for our clients
- ❖ Provides **affordable** service
- ❖ **Non-Invasive** to cell intrinsic properties

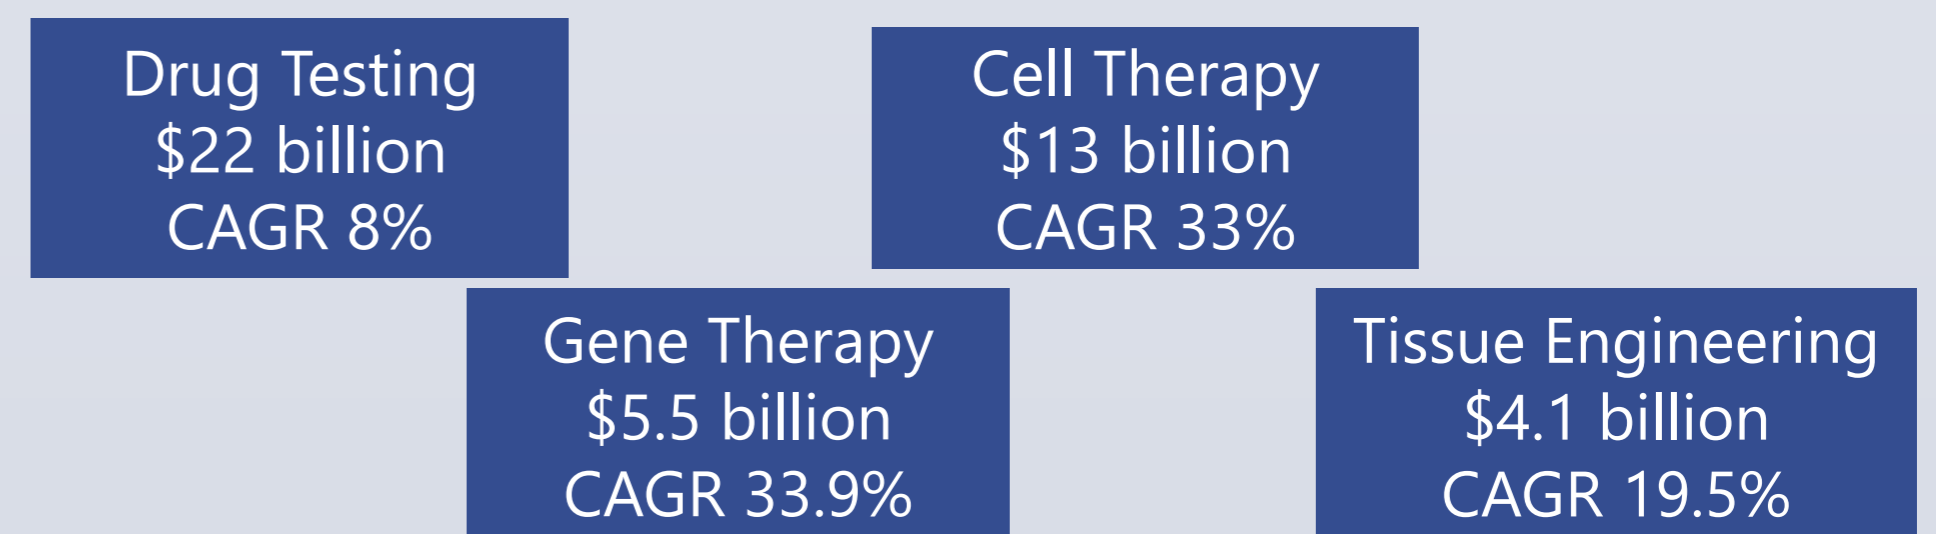

Beachhead Market

Clean Meat Industry

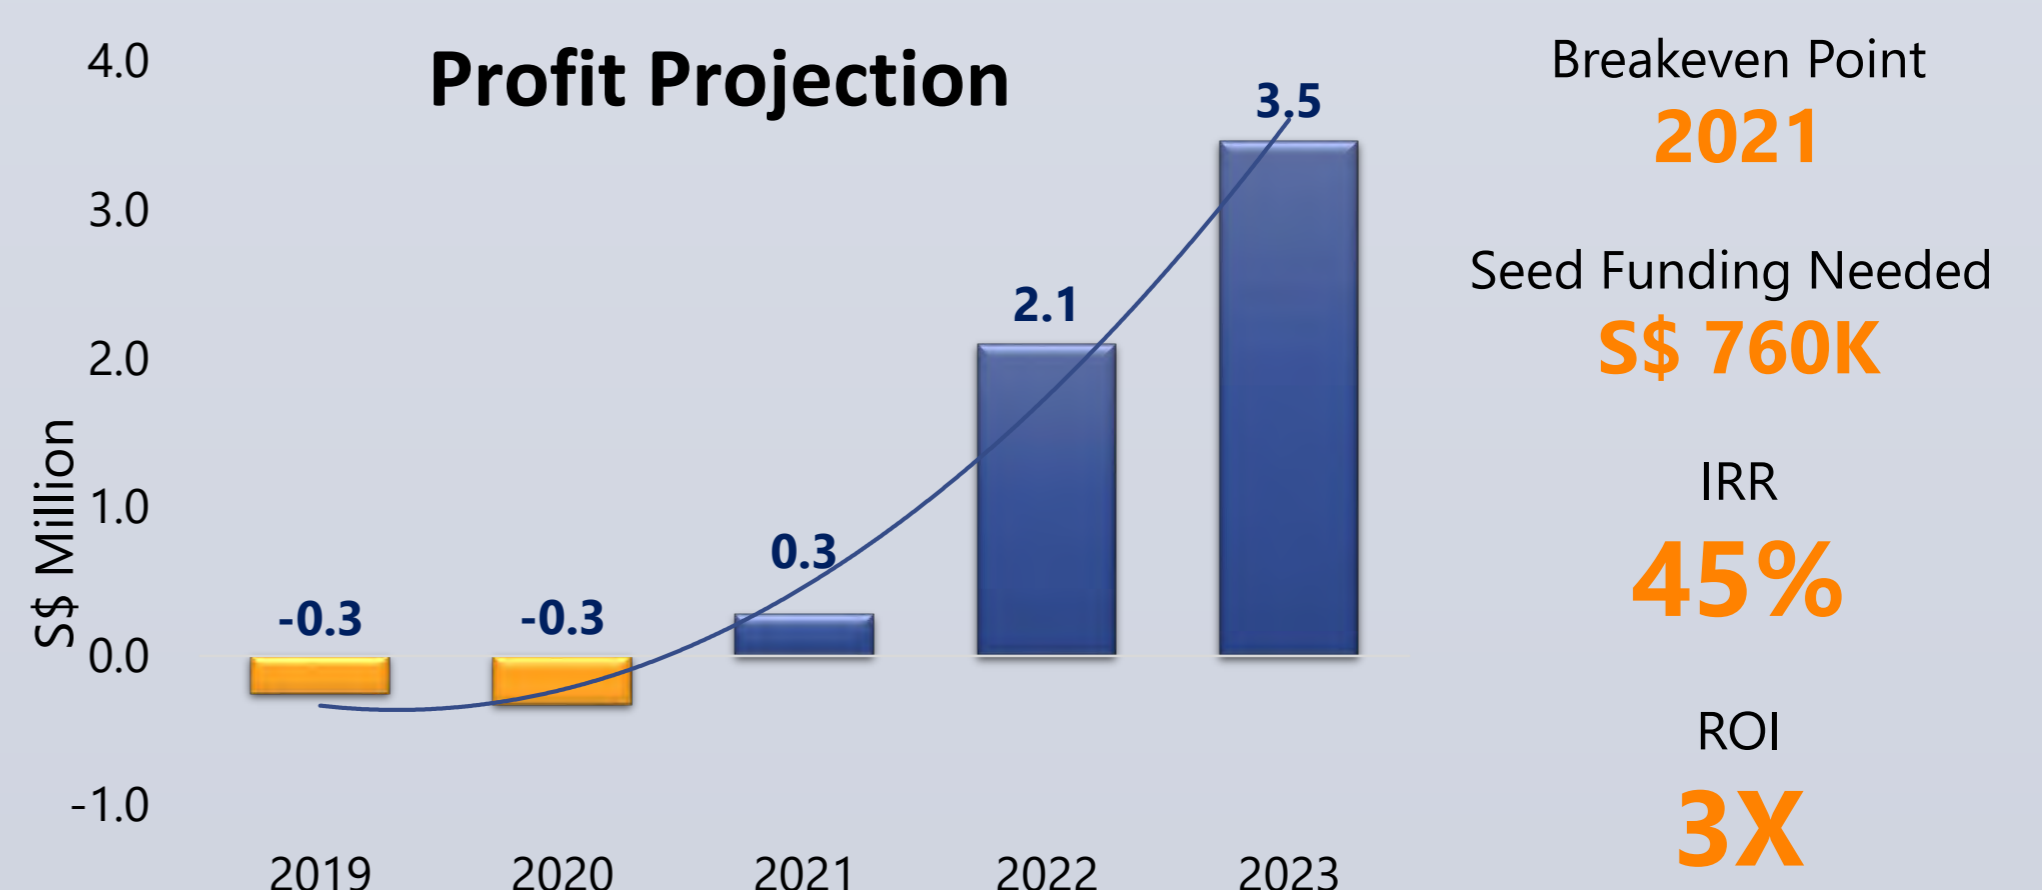

- ❖ Collaboration agreement in place with ShioK Meats Pte Ltd
- ❖ US\$ 304M funds received/invested in Clean Meat Companies (CMC)
- ❖ Growing investment and funding by major companies, investors, and government for research in Clean Meat commercialisation

Other Potential Market

Cell Culture Industry

Financial Projections
