

SensAI

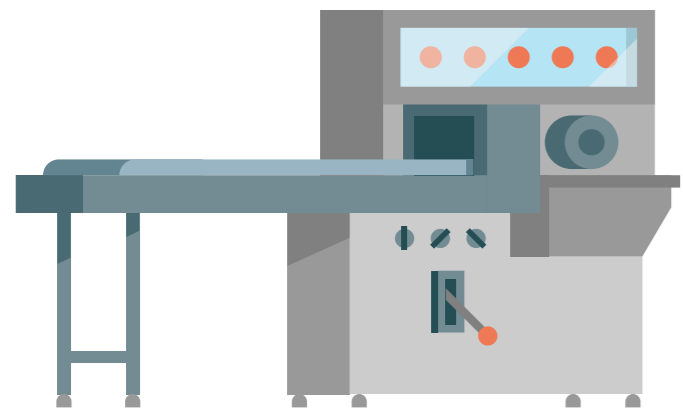

SensAI is commercializing an **Artificial Intelligence** enhanced sensing technology that addresses the need across **package seal industries** for real-time, online, accurate and robust quality assurance. The first application is **medical supply quality assurance**.

FAST SEAL INTEGRITY TESTING SOLUTION

PROBLEM

Quality checks on every package during production is impossible.

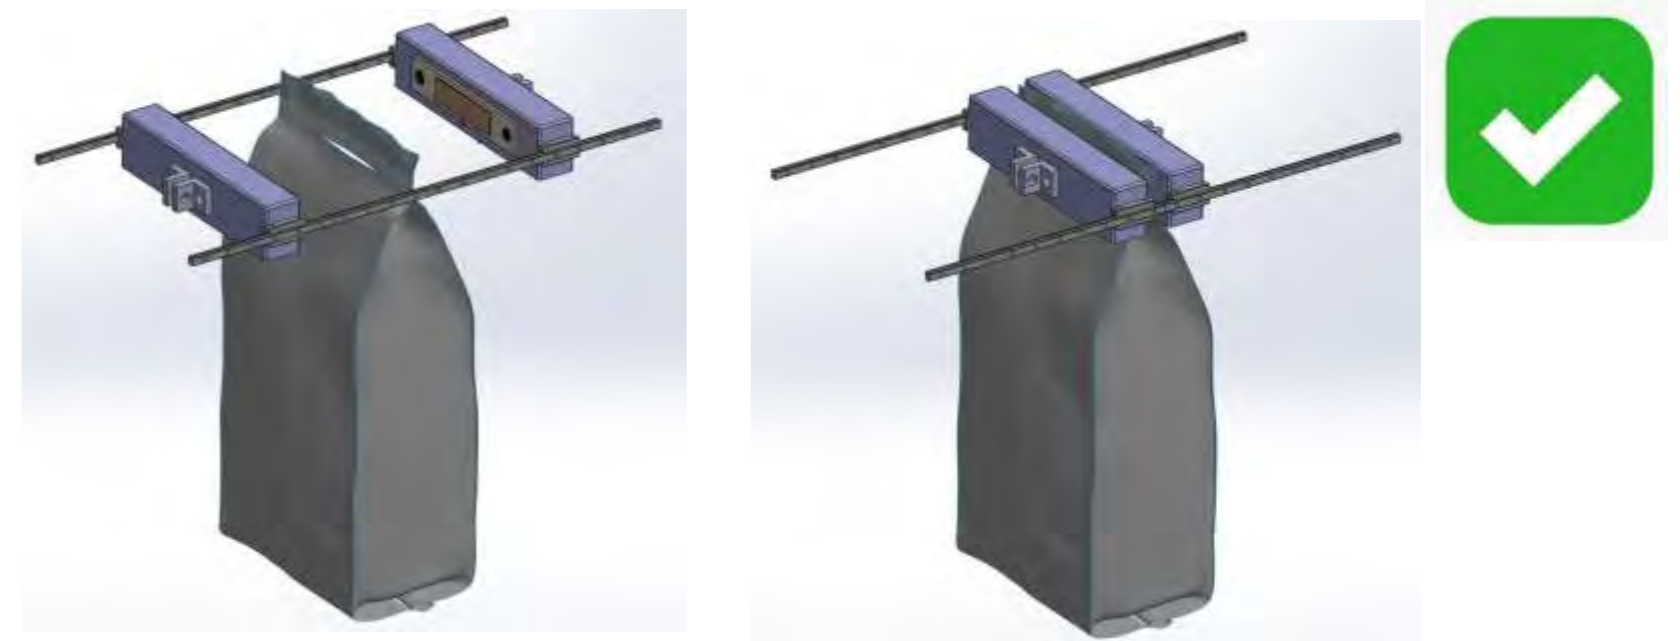

Contents can be unintendedly incorporated into the seal, which is not detectable.

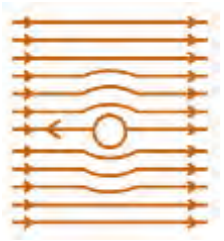

Existing solution is mostly destructive, slow and offline.

OUR PRODUCT

A fast and accurate Electromagnetic based non intrusive fully integrated seal integrity tester.

TECHNOLOGY

Highly Sensitive
able to detect minute particulars. (μm)

Highly Accurate
AI profiling enhancement to identify potential breach.

Cost Effective
than many existing solution.

Non-destructive and Non-intrusive.

Fast Testing
able to integrate with existing production line. (ms)

"This addresses one of the most common problem in the industry. **Not only does it ensure quality assurance, it greatly improves process efficiency.** I'm sure there will be interest from the market."

APAC Account Manager
Medical Equipment Manufacturer

60

Interviews

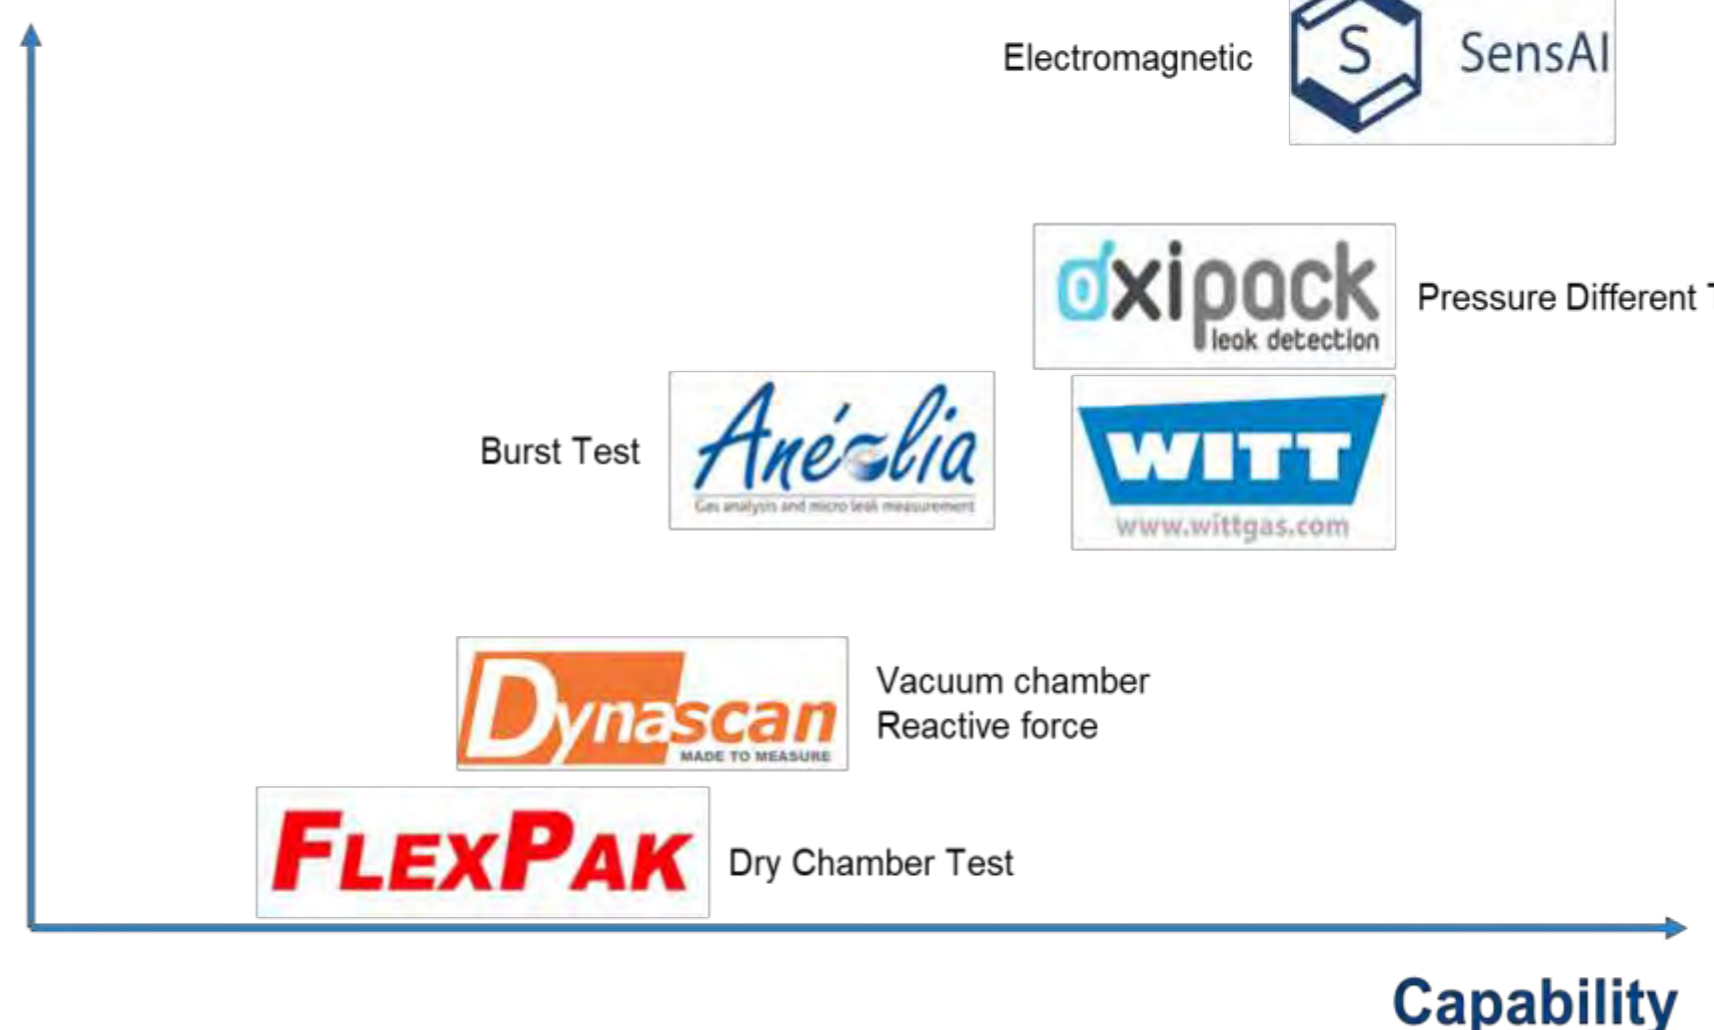

"There's always human error in the way we are processing the check now. **It will be great if every package can be checked.**"
