

CopTech

conduct power, better

CopTech is a patented technology specialized to produce lightweight, compact and strong conductive materials which can be made into wires, interconnects, plates.

PROBLEM STATEMENT

Short endurance of **20-40 minutes**

Caused by the low capacity offered by battery and heavy load of drones consuming large energy

SOLUTION

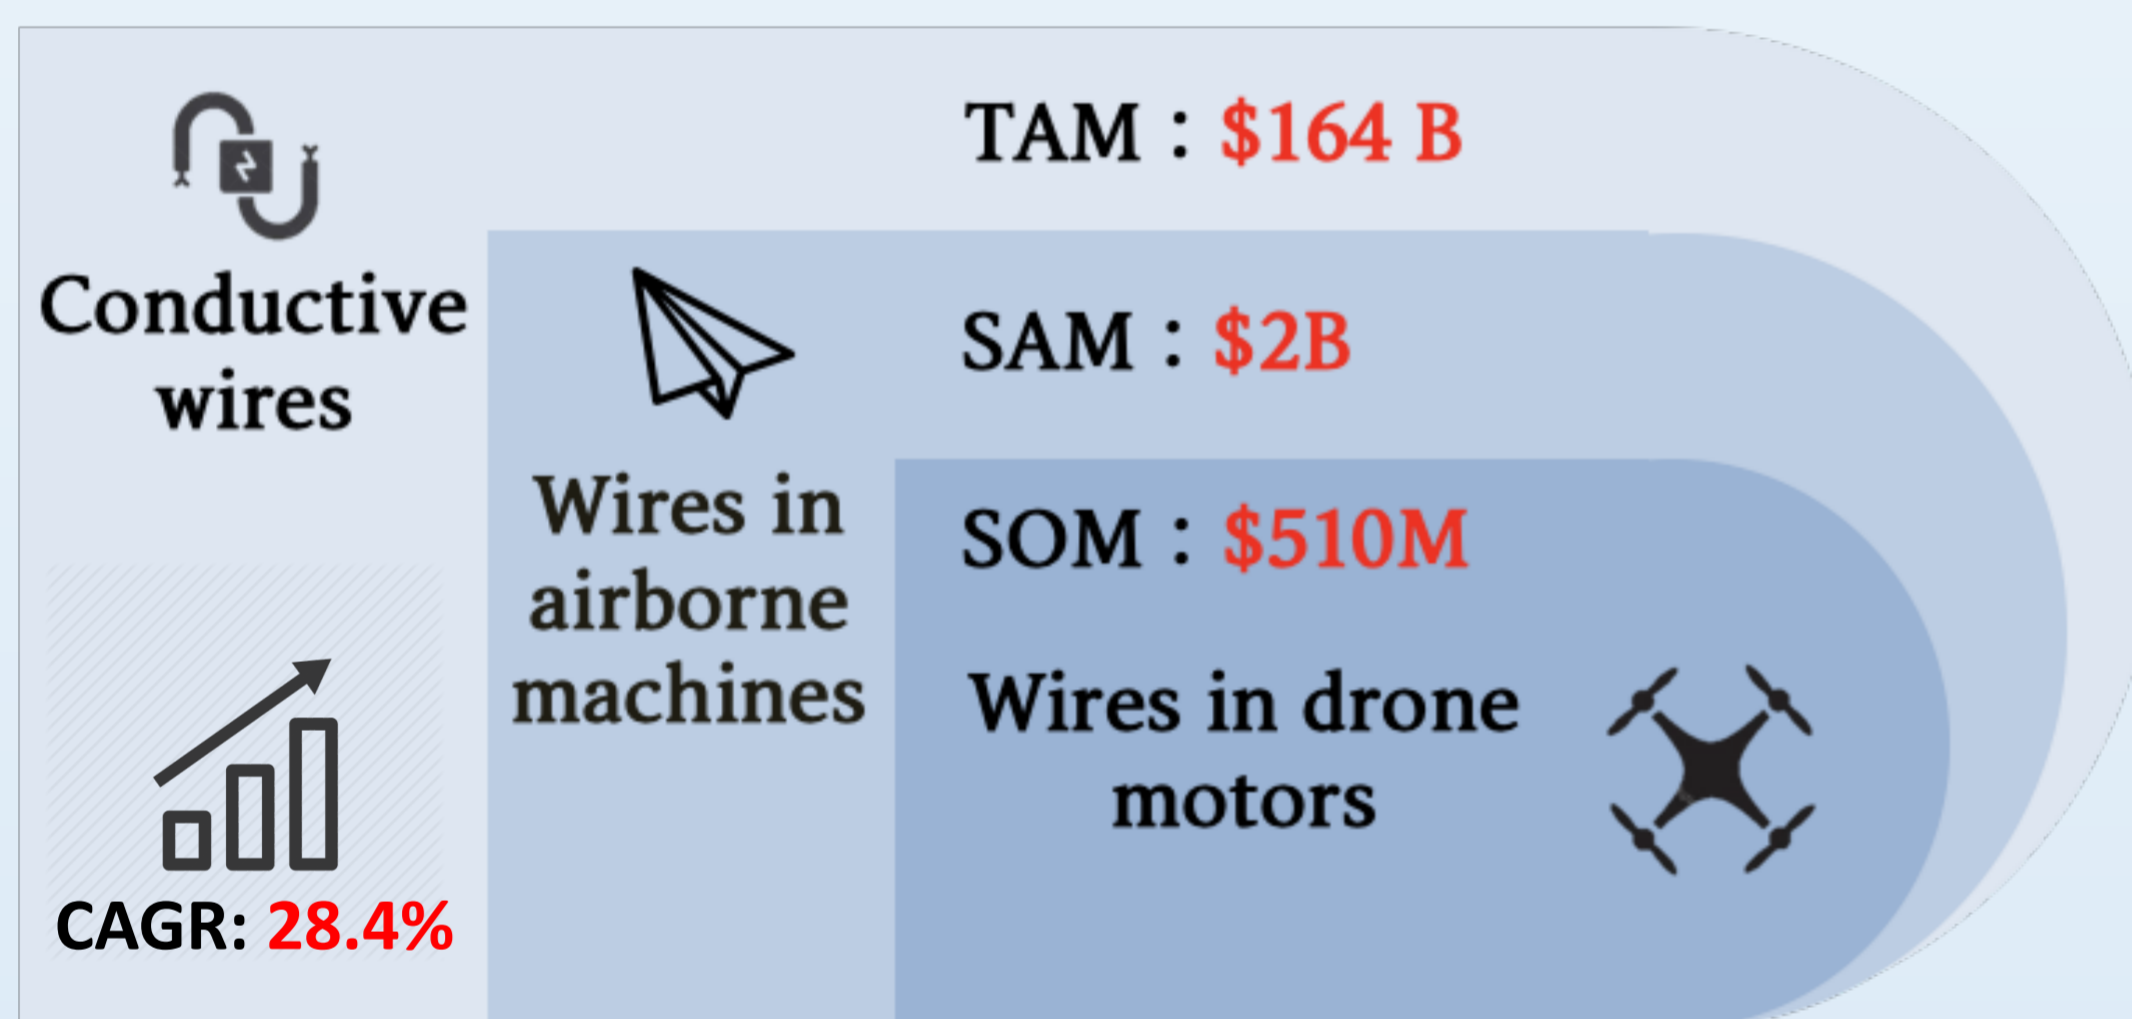

Make drones **lighter** by replacing the copper within drone motor coils with CopTech Wire

Flight time increased **27%**

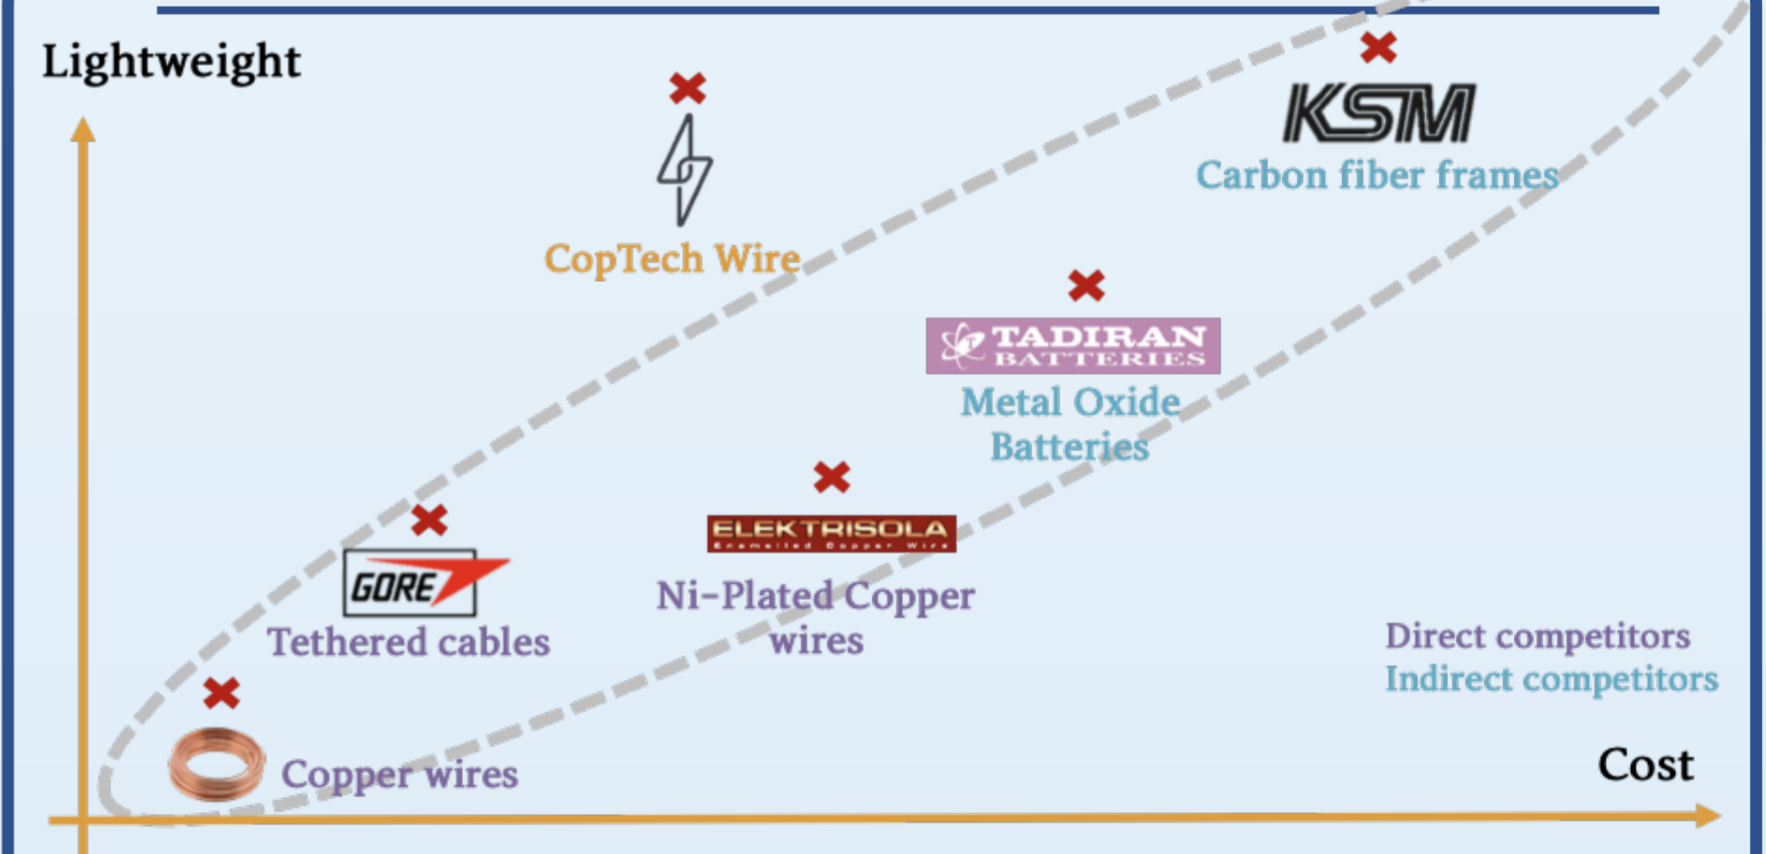

- 2X More Compact
- 3X Lighter
- 2X Stronger

MARKET SIZE

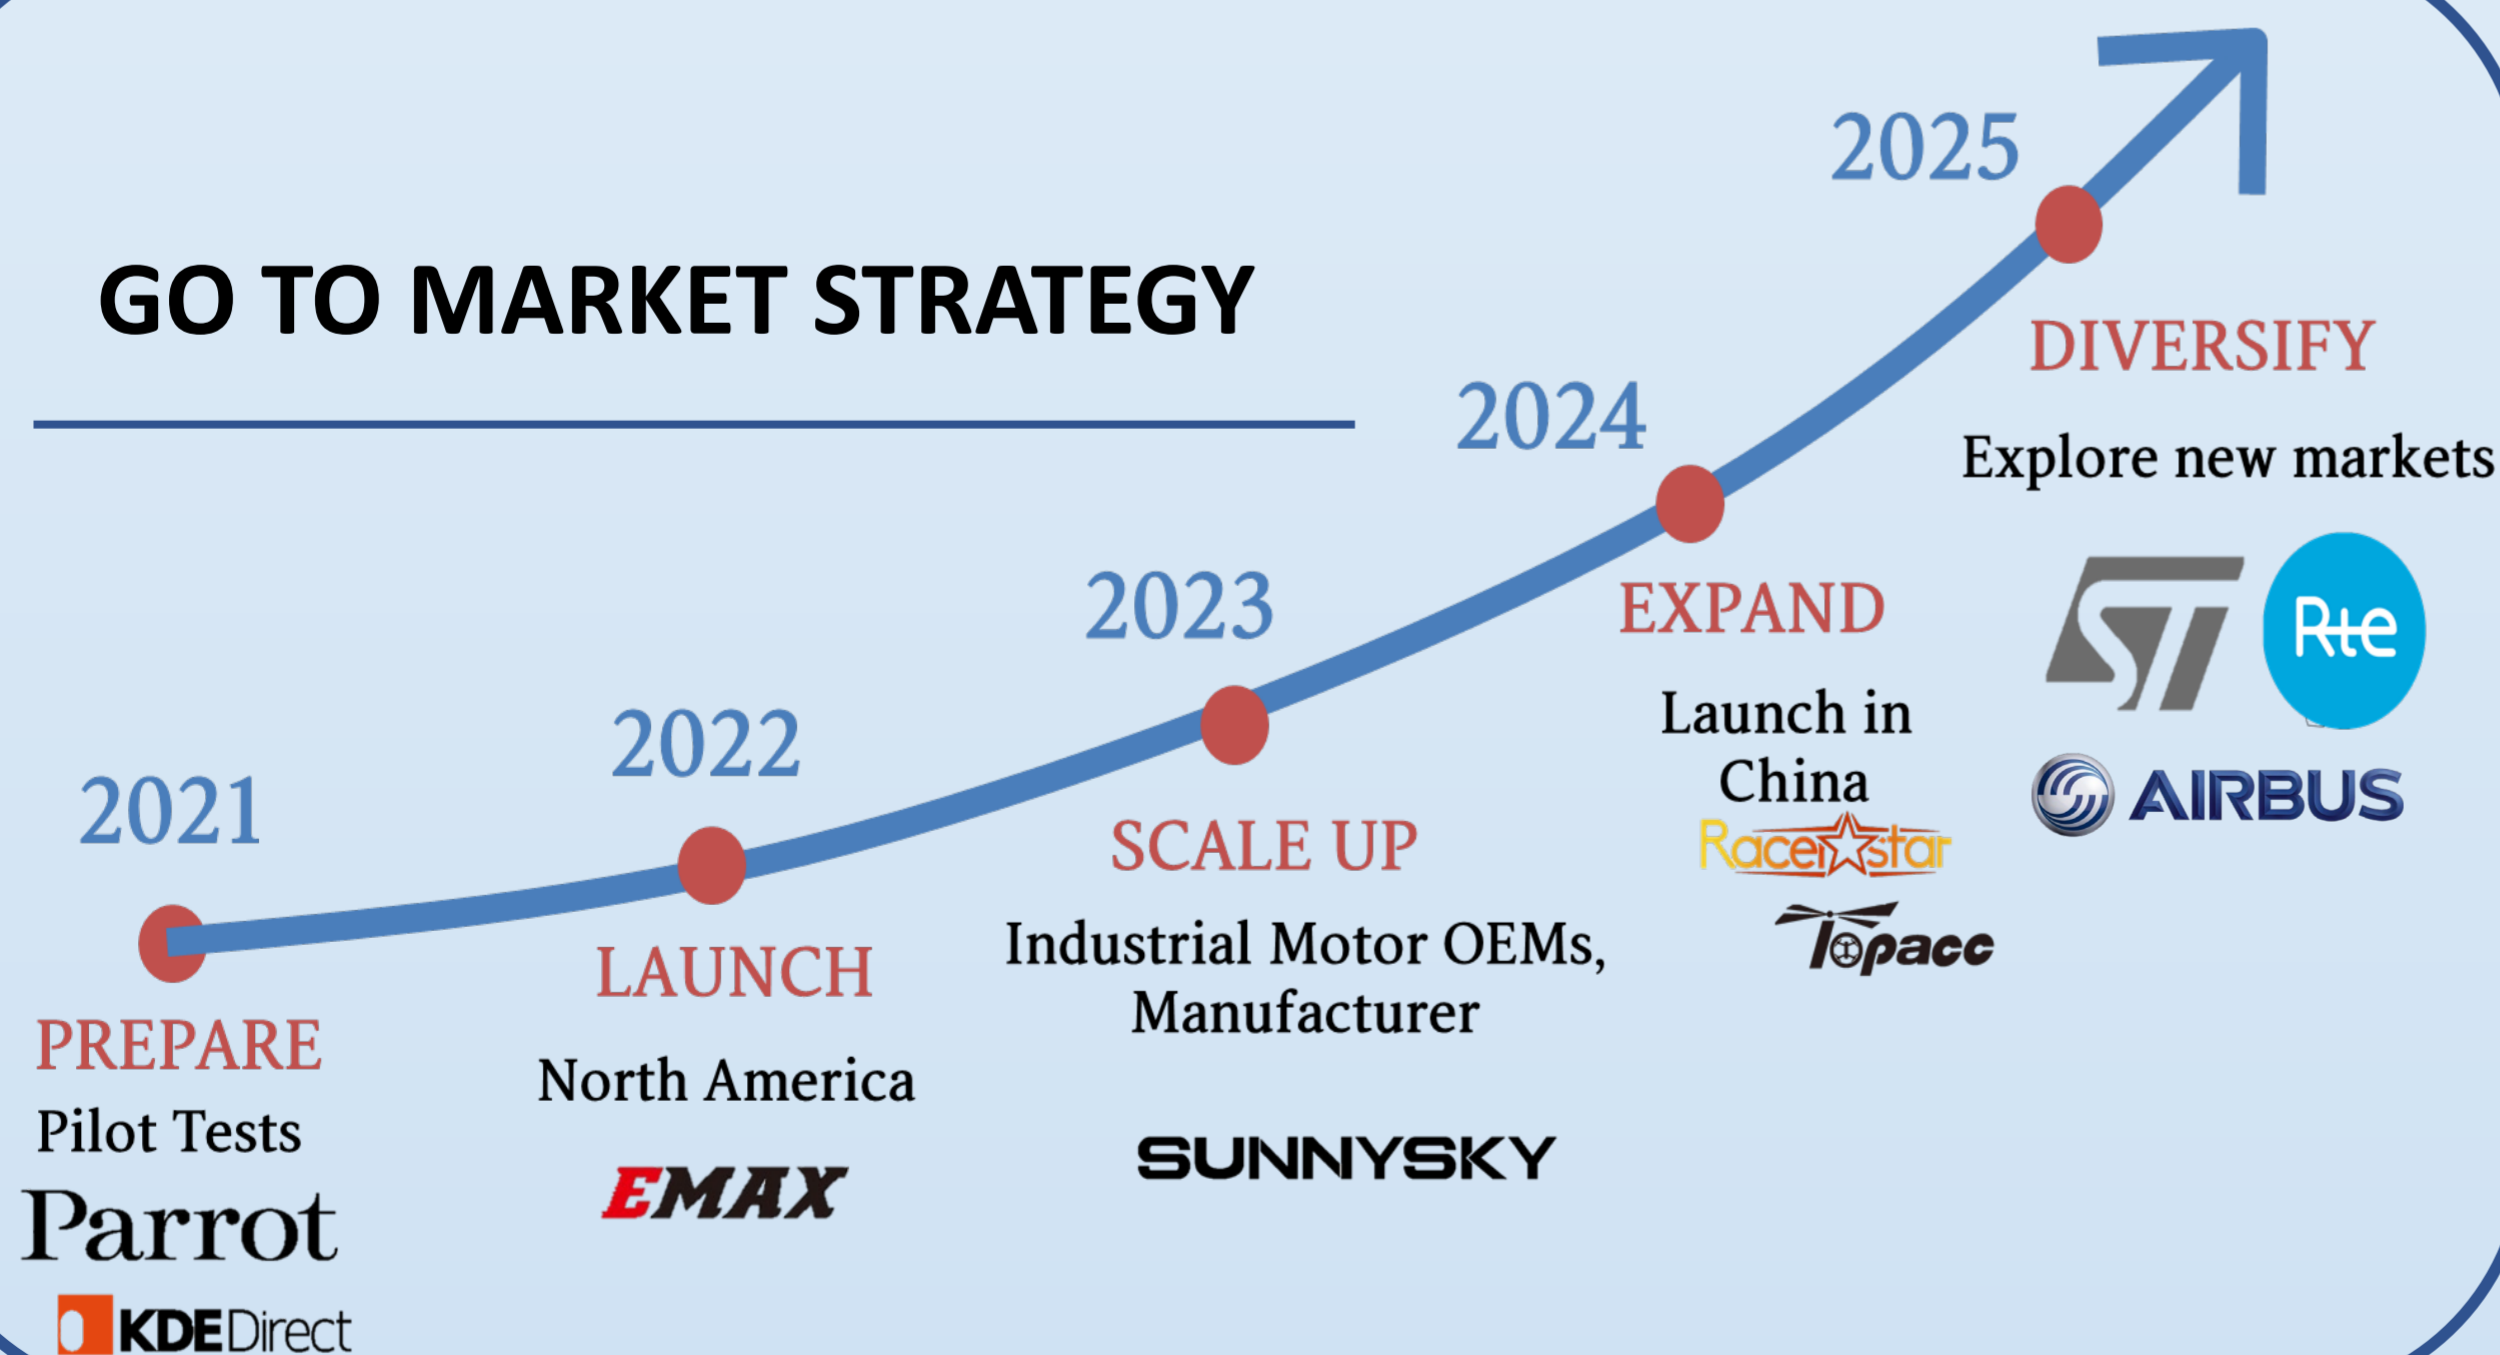

COMPETITIVE LANDSCAPE

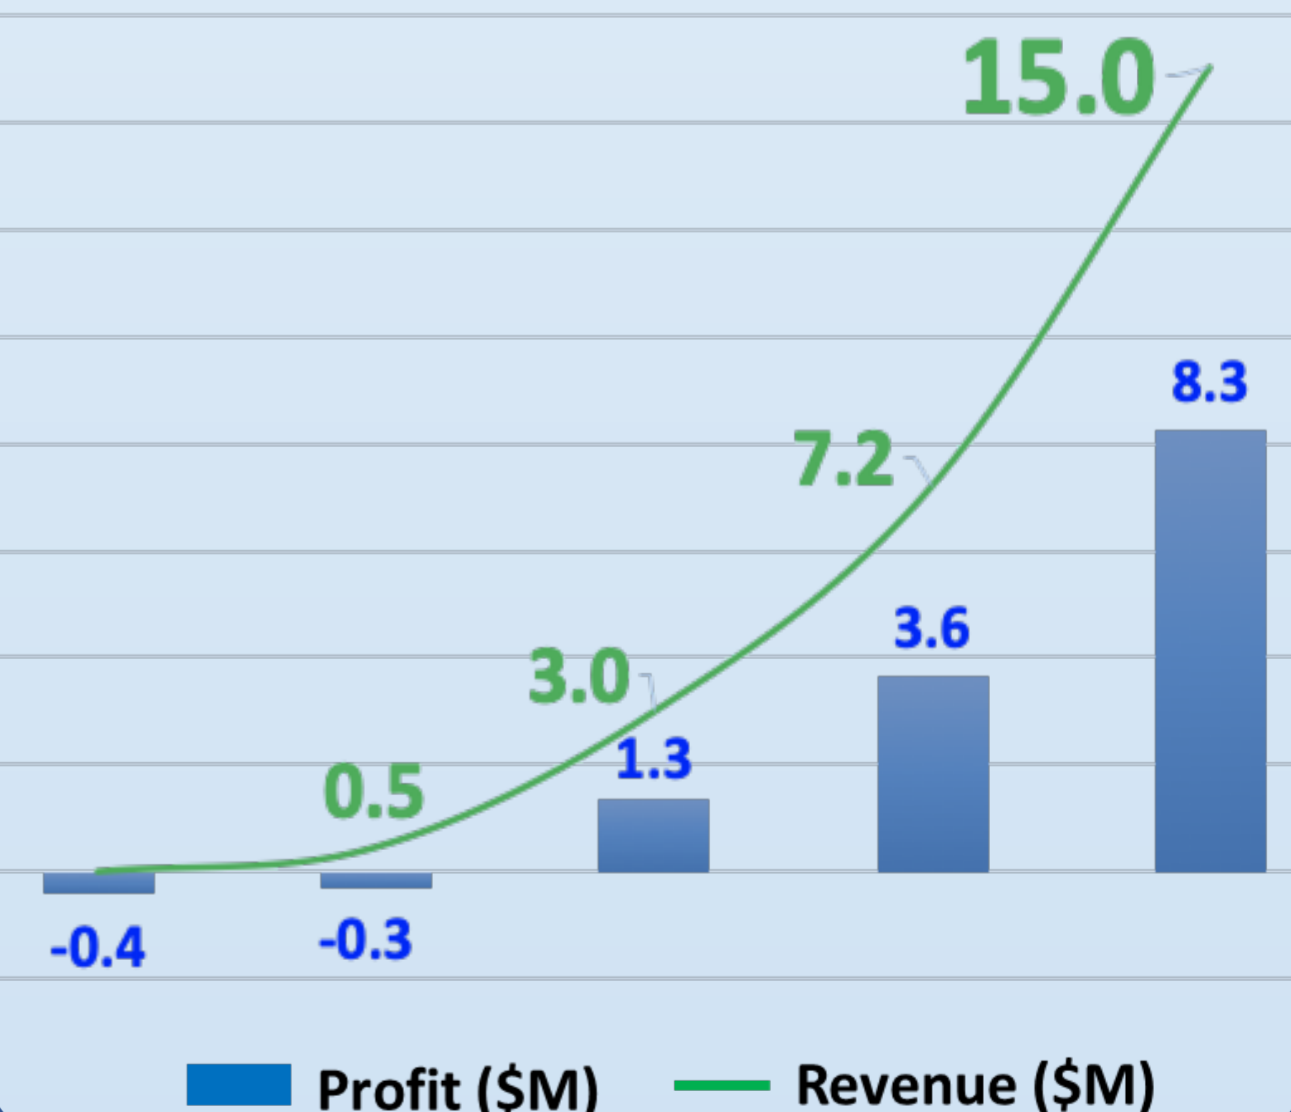

Outperforms for the super low lightweight and cost
