

Rebee is a telehealth ecosystem combining a software solution and sensors for conducting physiotherapy sessions remotely by medical practitioners.

PROBLEM

Long wait and high cost of healthcare contributes to non adherence of therapy sessions at hospitals & clinics thus prolonging the **patient** recovery process

Physiotherapist are unable to break free from excessive work schedules and rehab sessions

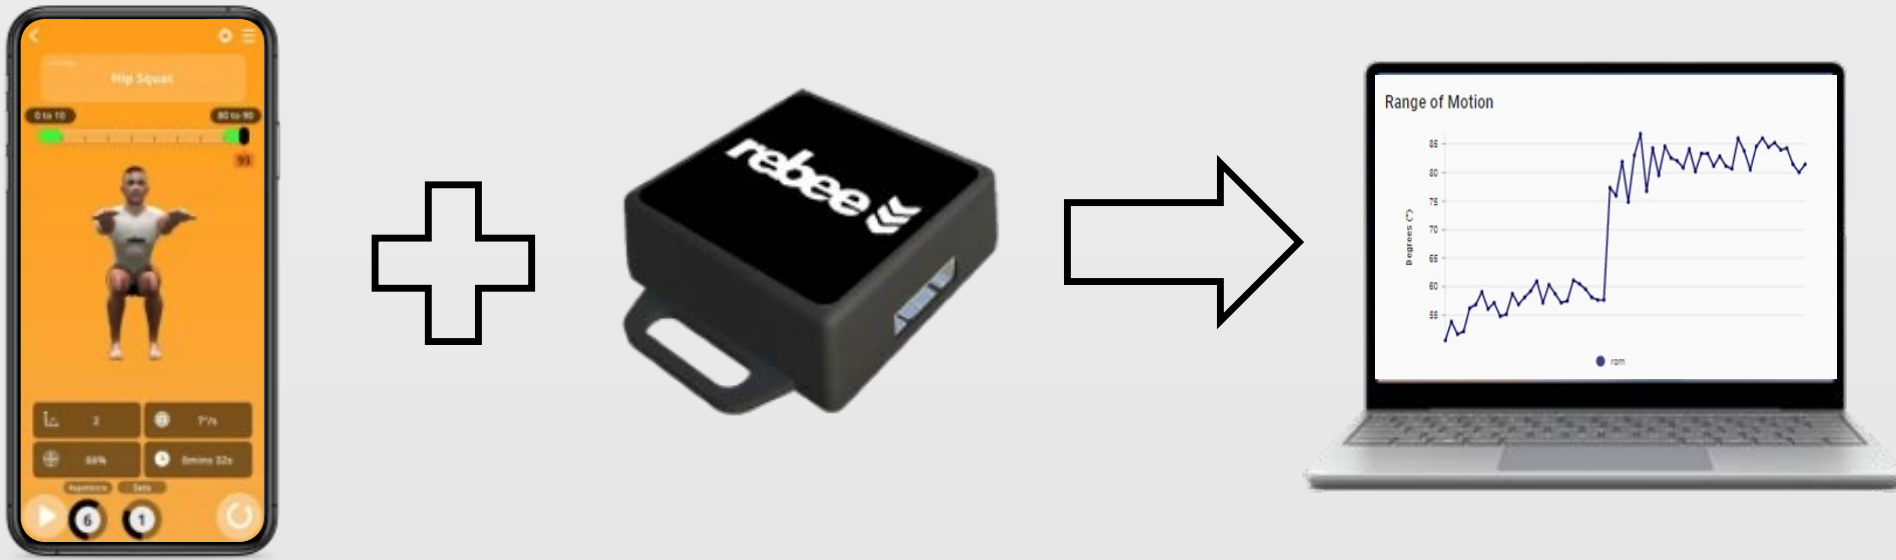

Thus this situations is leading to stress and burnout among **clinicians at rehabilitation centres**

Hospital Management need to optimise clinical workflow by lowering the patient to physiotherapist ratio

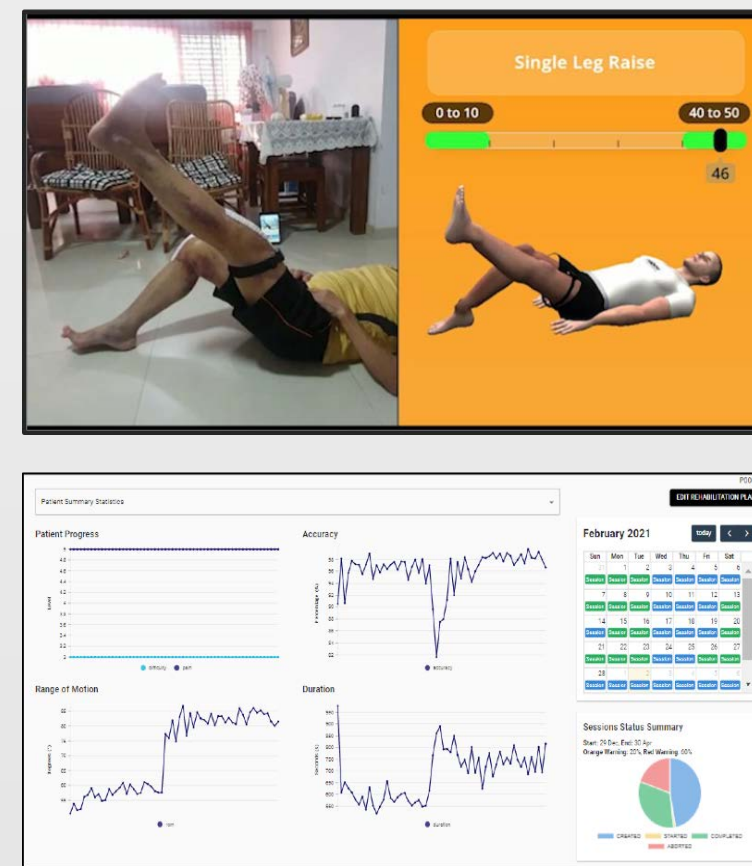

SOLUTION

Patient Application Wearable Sensors Therapist Web Portal

Currently, Rebee has been **approved by HSA** and being **used by 5 hospitals in Singapore.**

TECHNOLOGY

- ✓ **High Accuracy**
 - Advanced **9 axis** wearable sensor
 - Accurate to **+/-5 degrees**
- ✓ **Data Analytics**
 - Detailed data on **therapist dashboard**
 - Help therapist track compliance
- ✓ **3D Visualization**
 - **Intuitive & easy** to use

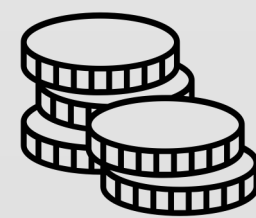

BENEFITS TO PATIENTS

Flexibility

Compliance

Affordability

BENEFITS TO HOSPITALS

High Efficiency of Therapist

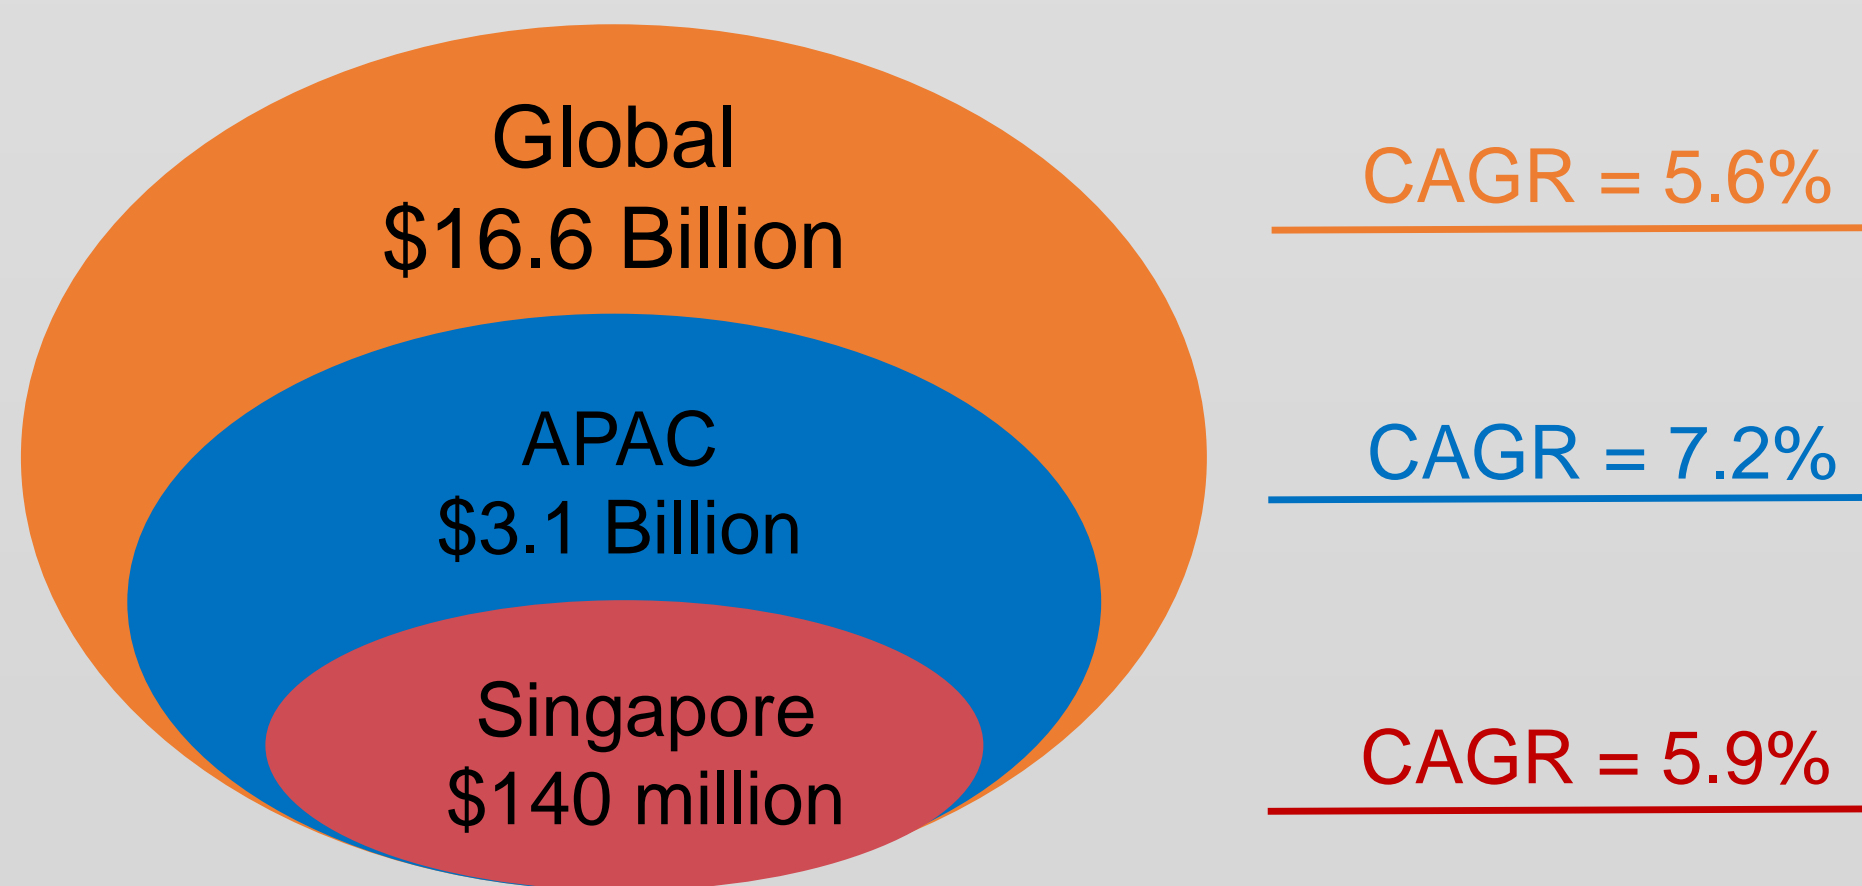

Reduced Patients Visits

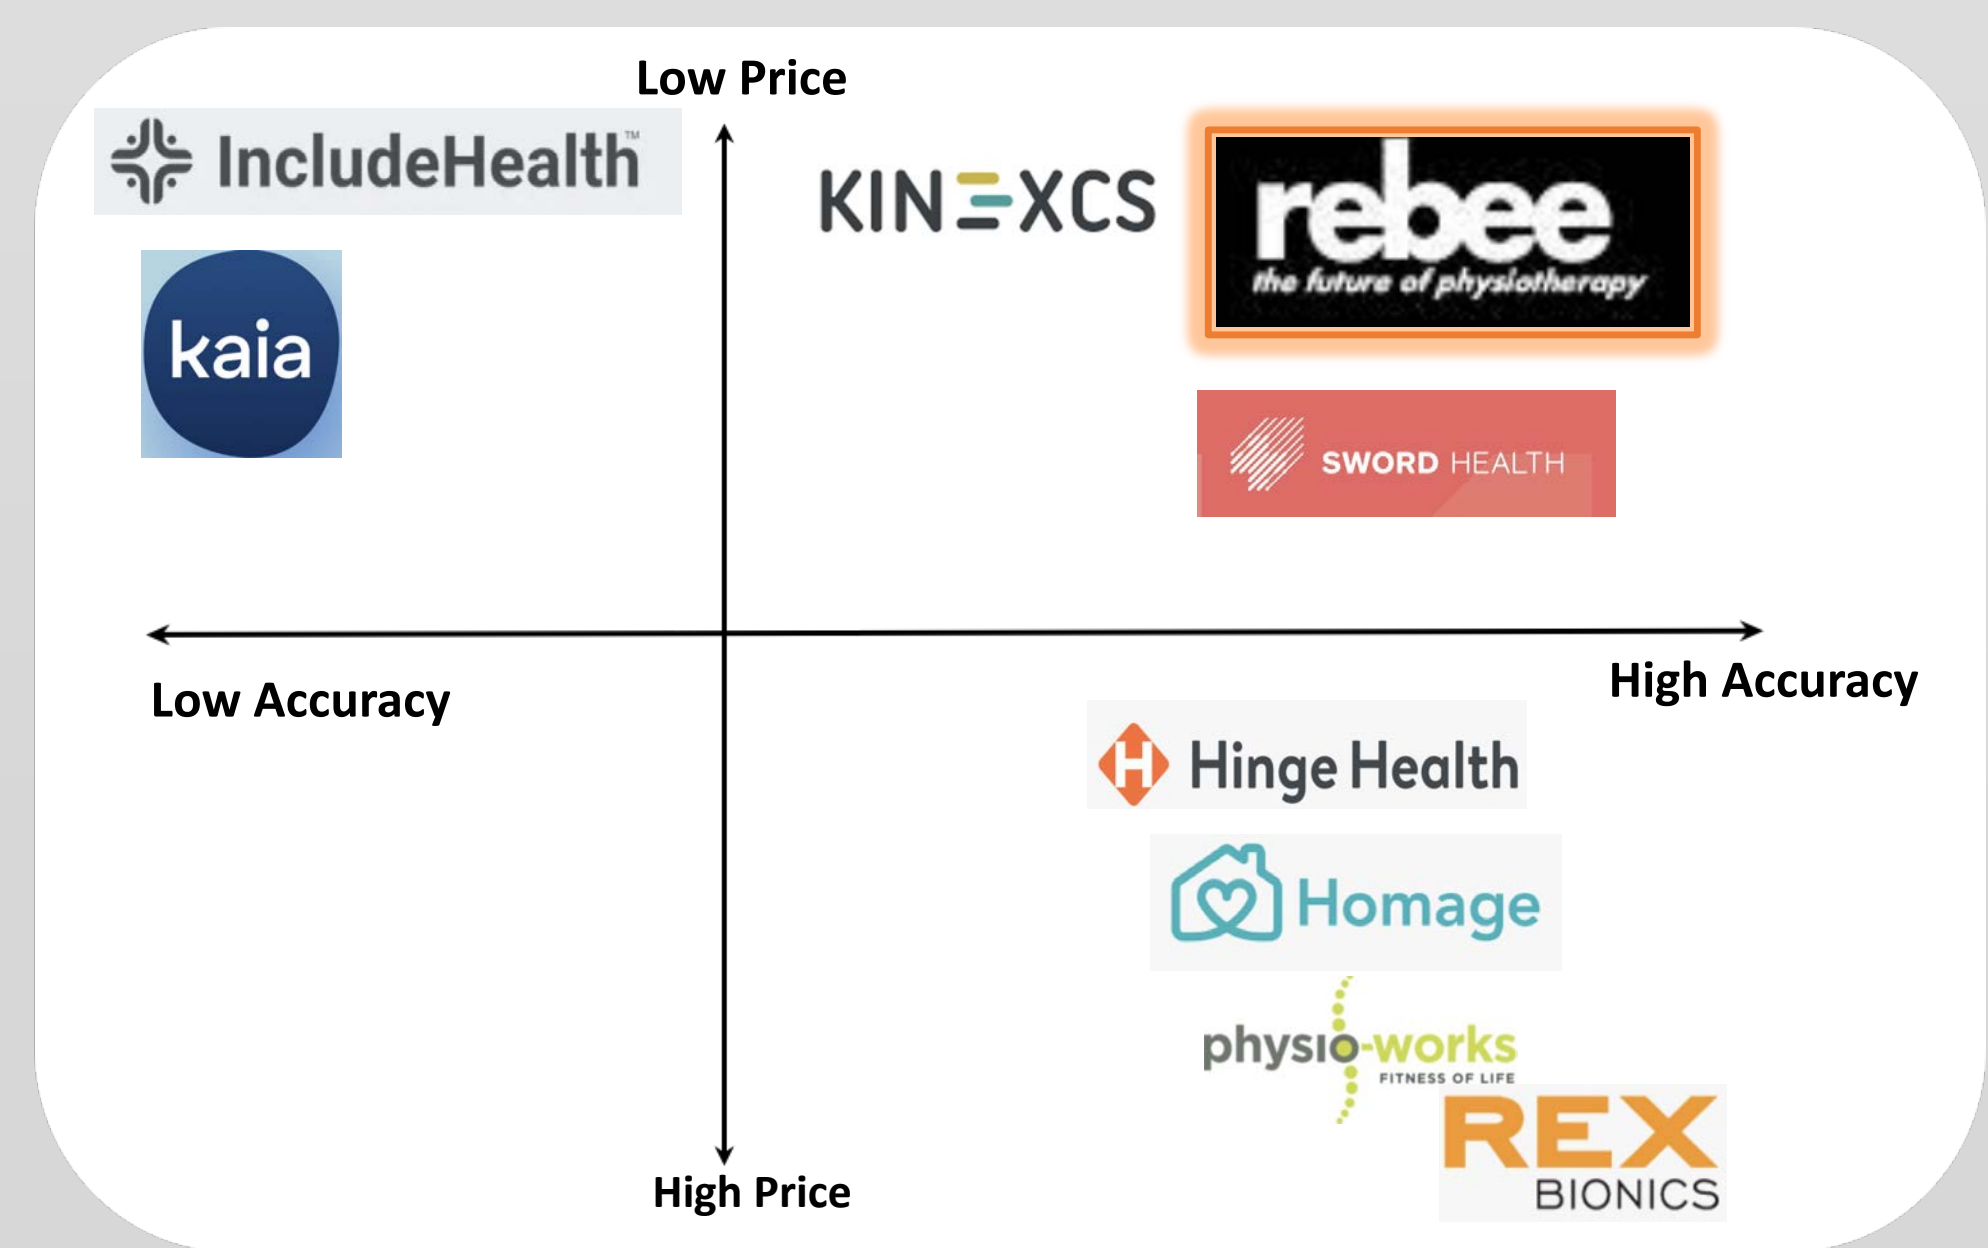

Optimized Clinical Workflow
